FDE#	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF#	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes (optional)
Article 4.1	N/A	Financial entities shall implement the rules laid down in Chapter II in accordance with the principle of proportionality, taking into account their size and overall risk profile, and the	Functional	intersects with	Statutory, Regulatory & Contractual Compliance	CPL-01	Mechanisms exist to facilitate the identification and implementation of relevant statutory, regulatory and contractual controls.	(optional)	
Article 4.2	N/A	nature, scale and complexity of their services, activities and operations. In addition, the application by financial entities of Chapters III, IV and V, Section I, shall be proportionate to their size and overall risk profile, and to the nature, scale and complexity of their services, activities and operations, as specifically provided for in the relevant rules of	Functional	intersects with	Statutory, Regulatory & Contractual Compliance	CPL-01	Mechanisms exist to facilitate the identification and implementation of relevant statutory, regulatory and contractual controls.	5	
4-11-1-10		those Chapters. The competent authorities shall consider the application of the proportionality principle by financial entities when reviewing the consistency of the ICT risk management framework on	Possitional.		Statutory, Regulatory &	001.04	Mechanisms exist to facilitate the identification and implementation of relevant statutory, regulatory and contractual controls.		
Article 4.3	N/A	the basis of the reports submitted upon the request of competent authorities pursuant to Article 6(5) and Article 16(2). Financial entities shall have in place an internal governance and control framework that	Functional	intersects with	Contractual Compliance Cybersecurity & Data	CPL-01	Mechanisms exist to facilitate the implementation of cybersecurity & data	5	
Article 5.1	N/A	ensures an effective and prudent management of ICT risk, in accordance with Article 6(4), in order to achieve a high level of digital operational resilience. The management body of the financial entity shall define, approve, oversee and be	Functional	subset of	Protection Governance Program	GOV-01	protection governance controls. Mechanisms exist to coordinate cybersecurity, data protection and business	10	
Article 5.2	N/A	responsible for the implementation of all arrangements related to the ICT risk management framework referred to in Article 6(1). For the purposes of the first subparagraph, the management body shall:	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2	N/A	The management body of the financial entity shall define, approve, oversee and be responsible for the implementation of all arrangements related to the ICT risk management framework referred to in Article 6(1). For the purposes of the first subparagraph, the management body shall:	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(a)	N/A	bear the ultimate responsibility for managing the financial entity's ICT risk;	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(a)	N/A	bear the ultimate responsibility for managing the financial entity's ICT risk;	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(b)	N/A	put in place policies that aim to ensure the maintenance of high standards of availability, authenticity, integrity and confidentiality, of data;	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(b)	N/A	put in place policies that aim to ensure the maintenance of high standards of availability, authenticity, integrity and confidentiality, of data;	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(c)	N/A	set clear roles and responsibilities for all ICT-related functions and establish appropriate governance arrangements to ensure effective and timely communication, cooperation and coordination among those functions;	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(c)	N/A	set clear roles and responsibilities for all ICT-related functions and establish appropriate governance arrangements to ensure effective and timely communication, cooperation and coordination among those functions;	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(c)	N/A	set clear roles and responsibilities for all ICT-related functions and establish appropriate governance arrangements to ensure effective and timely communication, cooperation and coordination among those functions;	Functional	intersects with	Defined Roles & Responsibilities	HRS-03	Mechanisms exist to define cybersecurity roles & responsibilities for all personnel.	5	
Article 5.2(d)	N/A	bear the overall responsibility for setting and approving the digital operational resilience strategy as referred to in Article (sig), including the determination of the appropriate risk tolerance level of ICT risk of the financial entity, as referred to in Article 6(8), point (b);	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business sligment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(d)	N/A	bear the overall responsibility for setting and approving the digital operational resilience strategy as referred to in Article 6(8), including the determination of the appropriate risk tolerance level of ICT risk of the financial entity, as referred to in Article 6(8), point (b);	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(e)	N/A	approve, oversee and periodically review the implementation of the financial entity's ICT business continuity policy and ICT response and recovery plans, referred to, respectively, in Articla 11(1) and (3), which may be acopted as a decided specific policy forming an integral part of the financial entity's overall business continuity policy and response and recovery plan;	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(e)	N/A	approxe, oversee and periodically review the implementation of the financial entity's ICT business continuity policy and ICT response and recovery plans, referred to, respectively, in Article 11(1) and (5), which may be adopted as a dedicated specific policy forming an integral part of the financial entity's overall business continuity policy and response and recovery plan;	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(f)	N/A	approve and periodically review the financial entity's ICT internal audit plans, ICT audits and material modifications to them;	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(f)	N/A	approve and periodically review the financial entity's ICT internal audit plans, ICT audits and material modifications to them;	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(g)	N/A	allocate and periodically review the appropriate budget to fulfil the financial entity's digital operational resilience needs in respect of all types of resources, including relevant ICT security awareness programmes and digital operational resilience training referred to in Article 13(6), and ICT skills for all staff;	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(g)	N/A	allocate and periodically review the appropriate budget to fulfil the financial entity's digital operational resilience needs in respect of all types of resources, including relevant ICT security awareness programmes and digital operational resilience training referred to in Article 13(6), and ICT skills for all staff;	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(h)	N/A	approve and periodically review the financial entity's policy on arrangements regarding the use of ICT services provided by ICT third-party service providers;	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a	5	
Article 5.2(h)	N/A	approve and periodically review the financial entity's policy on arrangements regarding the use of ICT services provided by ICT third-party service providers;	Functional	intersects with	Assigned Cybersecurity & Data Protection	GOV-04	regular basis. Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an	5	
Article 5.2(i)	N/A	put in place, at corporate level, reporting channels enabling it to be duly informed of the following:	Functional	intersects with	Responsibilities Status Reporting To Governing Body	GOV-01.2	enterprise-wide cybersecurity & data protection program. Mechanisms exist to provide governance oversight reporting and recommendations to those entrusted to make executive decisions about matters considered material to the organization's cybersecurity & data protection program.	5	
Article 5.2(i)(i)	N/A	arrangements concluded with ICT third-party service providers on the use of ICT services,	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(i)(i)	N/A	arrangements concluded with ICT third-party service providers on the use of ICT services,	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(i)(ii)	N/A	any relevant planned material changes regarding the ICT third-party service providers,	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business sligment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(i)(ii)	N/A	any relevant planned material changes regarding the ICT third-party service providers,	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	regular usass. Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.2(i)(iii)	N/A	the potential impact of such changes on the critical or important functions subject to those arrangements, including a risk analysis summary to assess the impact of those changes, and at least major ICT-related incidents and their impact, as well as response, recovery and corrective measures.	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
Article 5.2(i)(iii)	N/A	the potential impact of such changes on the critical or important functions subject to those arrangements, including a risk analysis summary to assess the impact of those changes, and at least major ICT-related incidents and their impact, as well as response, recovery and	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	regular passs. Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.3	N/A	corrective measures. Financial entities, other than microenterprises, shall establish a role in order to monitor the arrangements concluded with ICT third-party service providers on the use of ICT services, or shall designate a member of senior management as responsible for overseeing the related risk exposure and relevant documentation.	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
Article 5.4	N/A	Irisk exposure and relevant documentation. Members of the management body of the financial entity shall actively keep up to date with sufficient knowledge and skills to understand and assess ICT risk and its impact on the operations of the financial entity, including by following specific training on a regular basis, commensurate to the ICT risk being managed.	Functional	subset of	Statutory, Regulatory & Contractual Compliance	CPL-01	Mechanisms exist to facilitate the identification and implementation of relevant statutory, regulatory and contractual controls.	10	
Article 6.1	N/A	Financial entities shall have a sound, comprehensive and well-documented ICT risk management framework as part of their overall risk management system, which enables them to address ICT risk quickly, efficiently and comprehensively and to ensure a high level of	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.2	N/A	digital operational resilience. The CTT faik management framework shall include at least strategies, policies, procedures, ICT protocols and tools that are necessary to duly and adequately protect all information assets and ICT assets, including computer software, hardware, servers, as well as to protect all relevant physical components and infrastructures, such as premises, data centres and sensitive designated areas, to ensure that all information assets and ICT assets are adequately protected from risks including damage and unanthorised access or usage.	Functional	intersects with	Publishing Cybersecurity & Data Protection Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate cybersecurity & data protection policies, standards and procedures.	5

FDE#	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF#	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes (optional)
		The ICT risk management framework shall include at least strategies, policies, procedures,		acconstrip			Mechanisms exist to identify and document Standardized Operating Procedures	(optional)	
Article 6.2	N/A	ICT protocols and tools that are necessary to duly and adequately protect all information seets and ICT assets, including computer software, hardware, servers, see will set a protect all relevant physical components and infrastructures, such as premises, data centres and sensitive designated areas, to ensure that all information seets and ICT assets are adequately protected from risks including damage and unauthorised access or usage.	Functional	intersects with	Standardized Operating Procedures (SOP)	OPS-01.1	(SOP), or similar documentation, to enable the proper execution of day-to-day / assigned tasks.	5	
Article 6.2	N/A	The ICT fisk management framework shall include at least strategies, policies, procedures, ICT protocols and tools that are necessary to duly and adequately protect all information assets and ICT assets, including computer software, hardware, servers, a well as to protect all relevant physical components and infrastructures, such as premises, data centres and sensitive designated areas, to ensure that all information sets that of ICT assets and CT assets and dequately protected from risks including damage and unauthorised access or usage.	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.3	N/A	In accordance with their ICT risk management framework, financial entities shall minimise the impact of ICT risk by deploying appropriate strategies, policies, procedures, ICT protocols and tools. They shall provide complete and updated information on ICT risk and on their ICT risk management framework to the competent authorities upon their request.	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.4	N/A	Financial entities, other than microenterprises, shall assign the responsibility for managing and overseening ICT risk to a control function and ensure an appropriate level of independence of such control function in order to avoid conflicts of interest. Financial entities shall ensure appropriate segregation and independence of ICT risk management functions, control functions, and internal audit functions, according to the three lines of defence models, or an	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.5	N/A	Internal risk management and control model. The ICT risk management framework shall be documented and reviewed at least once a year, or periodically in the case of microenterprises, as well as upon the occurrence of major ICT-related incidents, and following supervisory instructions or conclusions derived from relevant digital operational resilience testing or audit processes. It shall be continuously improved on the basis of lessons derived from implementation and monitoring. A report on the review of the BCT risk management framework shall be submitted to the competent authority upon its	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.6	N/A	request. The ICT risk management framework of financial entities, other than microenterprises, shall be subject to internal sudit by auditors on a regular basis in line with the financial entities' audit plant. Those auditors shall possess sufficient knowledge, skills and expertise in ICT risk, as well as appropriate independence. The frequency and focus of ICT audits shall be commensurate to the ICT risk of the financial entity.	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.7	N/A	Based on the conclusions from the internal audit review, financial entities shall establish a formal follow-up process, including rules for the timely verification and remediation of critical ICT audit findings.	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.8	N/A	The ICT risk management framework shall include a digital operational resilience strategy setting out how the framework shall be implemented. To that end, the digital operational resilience strategy shall include methods to address ICT risk and attain specific ICT objectives, by:	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
Article 6.8	N/A	The ICT risk management framework shall include a digital operational resilience strategy setting out how the framework shall be implemented. To that end, the digital operational resilience strategy shall include methods to address ICT risk and attain specific ICT	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.8(a)	N/A	Objectives, by: explaining how the ICT risk management framework supports the financial entity's business strategy and objectives;	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
Article 6.8(a)	N/A	explaining how the ICT risk management framework supports the financial entity's business strategy and objectives;	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.8(b)	N/A	establishing the risk tolerance level for ICT risk, in accordance with the risk appetite of the financial entity, and analysing the impact tolerance for ICT disruptions; establishing the risk tolerance level for ICT risk, in accordance with the risk appetite of the	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
Article 6.8(b)	N/A N/A	establishing the risk tolerance level for ICT risk, in accordance with the risk appetite of the financial entity, and analysing the impact tolerance for ICT disruptions; setting out clear information security objectives, including key performance indicators and	Functional	subset of	Risk Management Program Strategic Plan &	RSK-01 PRM-01.1	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls. Article 6.8(d)	N/A	key risk metrics; explaining the ICT reference architecture and any changes needed to reach specific business objectives;	Functional	intersects with	Program Strategic Plan & Objectives	PRM-01.1	tactical risk management controls. Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
Article 6.8(d)	N/A	explaining the ICT reference architecture and any changes needed to reach specific business objectives;	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.8(e)	N/A	outlining the different mechanisms put in place to detect ICT-related incidents, prevent their impact and provide protection from it;	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
Article 6.8(e)	N/A	outlining the different mechanisms put in place to detect ICT-related incidents, prevent their impact and provide protection from it; evidencing the current digital operational resilience situation on the basis of the number of	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls. Mechanisms exist to establish a strategic cybersecurity & data privacy-specific	10	
Article 6.8(f)	N/A	major ICT-related incidents reported and the effectiveness of preventive measures;	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	business plan and set of objectives to achieve that plan.	5	
Article 6.8(f)	N/A	evidencing the current digital operational resilience situation on the basis of the number of major ICT-related incidents reported and the effectiveness of preventive measures;	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
Article 6.8(g)	N/A	implementing digital operational resilience testing, in accordance with Chapter IV of this Regulation;	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
Article 6.8(g)	N/A	implementing digital operational resilience testing, in accordance with Chapter IV of this Regulation;	Functional	subset of	Risk Management Program Strategic Plan &	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls. Mechanisms exist to establish a strategic cybersecurity & data privacy-specific	10	
Article 6.8(h)	N/A	outlining a communication strategy in the event of ICT-related incidents the disclosure of which is required in accordance with Article 14. outlining a communication strategy in the event of ICT-related incidents the disclosure of	Functional	intersects with	Objectives Risk Management	PRM-01.1	recramsms exist to establish a strategic cypersecurity & data privacy-specific business plan and set of objectives to achieve that plan. Mechanisms exist to facilitate the implementation of strategic, operational and	5	
Article 6.8(h)	N/A	which is required in accordance with Article 14. Financial entities may, in the context of the digital operational resilience strategy referred to	Functional	subset of	Program	RSK-01	tactical risk management controls. Mechanisms exist to facilitate the implementation of strategic, operational and	10	
Article 6.9	N/A	in paragraph 8, define a holistic ICT multi-vendor strategy, at group or entity level, showing key dependencies on ICT third-party service providers and explaining the rationale behind the procurement mix of ICT third-party service providers. Financial entities may, in accordance with Union and national sectoral law, outsource the	Functional	subset of	Risk Management Program	RSK-01	tactical risk management controls. Mechanisms exist to facilitate the implementation of strategic, operational and	10	
Article 6.10	N/A	tasks of verifying compliance with ICT risk management requirements to intra-group or external undertakings. In case of such outsourcing, the financial entity remains fully responsible for the verification of compliance with the ICT risk management requirements.	Functional	subset of	Risk Management Program Operationalizing	RSK-01	tactical risk management controls.	10	
Article 7	N/A	In order to address and manage ICT risk, financial entities shall use and maintain updated ICT systems, protocols and tools that are:	Functional	intersects with	Cybersecurity & Data Protection Practices	GOV-15	Mechanisms exist to compel data and/or process owners to operationalize cybersecurity & data privacy practices for each system, application and/or service under their control.	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Operationalizing Cybersecurity & Data Protection Practices	GOV-15	Mechanisms exist to compel data and/or process owners to operationalize cybersecurity & data privacy practices for each system, application and/or service under their control.	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Select Controls	GOV-15.1	Mechanisms exist to compet data and/or process owners to select required cybersecurity & data privacy controls for each system, application and/or service	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Implement Controls	GOV-15.2	under their control. Mechanisms exist to compel data and/or process owners to implement required cybersecurity & data privacy controls for each system, application and/or service under their control.	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Assess Controls	GOV-15.3	Mechanisms exist to compel data and/or process owners to assess if required	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Authorize Systems, Applications & Services	GOV-15.4	Mechanisms exist to compel data and/or process owners to obtain authorization for the production use of each system, application and/or service under their control.	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Monitor Controls	GOV-15.5	Mechanisms exist to compel data and/or process owners to monitor systems, applications and/or services under their control on an ongoing basis for applicable threats and risks, as well as to ensure cybersecurity & data privacy controls are operating as intended.	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	subset of	Cybersecurity & Data Privacy Portfolio Management	PRM-01	Mechanisms exist to facilitate the implementation of cybersecurity & data privacy- related resource planning controls that define a viable plan for achieving cybersecurity & data privacy objectives.	10	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Cybersecurity & Data Privacy Resource Management	PRM-02	Mechanisms exist to address all capital planning and investment requests, including the resources needed to implement the cybersecurity & data privacy programs and document all exceptions to this requirement.	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Allocation of Resources	PRM-03	Mechanisms exist to identify and allocate resources for management, operational, technical and data privacy requirements within business process planning for	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Cybersecurity & Data Privacy In Project Management	PRM-04	projects / initiatives. Mechanisms exist to assess cybersecurity & data privacy controls in system project development to determine the extent to which the controls are implemented correctly, operating as intended and producing the desired outcome with respect to meeting the requirements.	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4;	Functional	intersects with	Cybersecurity & Data Privacy Requirements Definition	PRM-05	Mechanisms exist to identify critical system components and functions by performing a criticality analysis for critical systems, system components or services at pre-defined decision points in the Secure Development Life Cycle (SDLC).	5	
Article 7(a)	N/A	appropriate to the magnitude of operations supporting the conduct of their activities, in accordance with the proportionality principle as referred to in Article 4; reliable:	Functional	intersects with	Secure Development Life Cycle (SDLC) Management Operationalizing	PRM-07	Mechanisms exist to ensure changes to systems within the Secure Development Life Cycle (SDLC) are controlled through formal change control procedures. Mechanisms exist to compel data and/or process owners to operationalize	5	
Article 7(b)	N/A		Functional	intersects with	Cybersecurity & Data Protection Practices	GOV-15	cybersecurity & data privacy practices for each system, application and/or service under their control.	5	
Article 7(b)	N/A	reliable;	Functional	intersects with	Select Controls	GOV-15.1	Mechanisms exist to compel data and/or process owners to select required cybersecurity & data privacy controls for each system, application and/or service under their control.	5	
Article 7(b)	N/A	reliable;	Functional	intersects with	Implement Controls	GOV-15.2	Mechanisms exist to compet data and/or process owners to implement required cybersecurity & data privacy controls for each system, application and/or service under their control.	5

1		Financial entities shall identify all information assets and ICT assets, including those on	- Hationate	netakonsnip			Mechanisms exist to perform inventories of technology assets that:	(optional)	
Article 8.4	N/A	remote sites, network resources and hardware equipment, and shall map those considered critical. They shall map the configuration of the information assets and ICT assets and the links and interdependencies between the different information assets and ICT assets.	Functional	intersects with	Asset Inventories	AST-02	(1) Accurately reflects the current systems, applications and services and surfaces. (I) Gleinfillers authorized software products, including business justification details; (3) is at the level of granularity deemed necessary for tracking and reporting; (4) includes organization-defined information deemed necessary for achieve effective property accountability, and (5) is available for every and such fry designated organizational personnel.	5	
Article 8.4	N/A	Financial entities shall identify all information assets and ICT assets, including those on remote sites, network resources and hardware equipment, and shall map those considered critical. They shall map the configuration of the information assets and ICT assets and the links and interdependencies between the different information assets and ICT assets.	Functional	intersects with	Network Diagrams & Data Flow Diagrams (DFDs)	AST-04	Mechanisms exist to maintain network architecture diagrams that: (1) Contain sufficient detail to assess the security of the network's architecture; (2) Reflect the current architecture of the network environment; and (3) Document all sensitive/regulated data flows.	5	
Article 8.4	N/A	Financial entities shall identify all information assets and ICT assets, including those on remote sites, network resources and hardware equipment, and shall map those considered critical. They shall map the configuration of the information assets and ICT assets and the links and interdependencies between the different information assets and ICT assets.	Functional	intersects with	Identify Critical Assets	BCD-02	Mechanisms exist to identify and document the critical systems, applications and services that support essential missions and business functions.	5	
Article 8.4	N/A	Financial entities shall identify all information assets and ICT assets, including those on reunde sites, network resources and hardware equipment, and shall map those considered critical. They shall map the configuration of the information assets and ICT assets and the links and interdependencies between the different information assets and ICT assets.	Functional	intersects with	Third-Party Criticality Assessments	TPM-02	Mechanisms exist to identify, prioritize and assess suppliers and partners of critical systems, components and services using a supply chain risk assessment process relative to their importance in supporting the delivery of high-value services.	5	
Article 8.5	N/A	Financial entities shall identify and document all processes that are dependent on ICT third- party service providers, and shall identify interconnections with ICT third-party service providers that provide services that support critical or important functions.	Functional	intersects with	Asset-Service Dependencies	AST-01.1	Mechanisms exist to identify and assess the security of technology assets that support more than one critical business function.	5	
Article 8.6	N/A	For the purposes of paragraphs 1, 4 and 5, financial entities shall maintain relevant inventories and update them periodically and every time any major change as referred to in paragraph 3 occurs.	Functional	intersects with	Asset Inventories	AST-02	Mechanisms exist to perform inventories of technology assets tratt. [1] Accurately reflects the current systems, applications and envices in use; [2] Identifies authorized software products, including business justification details; [3] is at the level of granularity deemen descessary for tracking and reporting; [4] Includes organization-defined information deemed necessary to achieve effective property accurateality, and [5] is available for review and audit by designated organizationspersonnel.	5	
Article 8.6	N/A	For the purposes of paragraphs 1, 4 and 5, financial entities shall maintain relevant inventories and update them periodically and every time any major change as referred to in paragraph 3 occurs.	Functional	intersects with	Updates During Installations / Removals	AST-02.1	Mechanisms exist to update asset inventories as part of component installations, removals and asset upgrades.	5	
Article 8.7	N/A	Financial entities, other than microenterprises, shall on a regular basis, and at least yearly, conduct a specific ICT risk assessment on all legacy ICT systems and, in any case before and after connecting technologies, applications or systems.	Functional	intersects with	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's systems and data.	5	
Article 8.7	N/A	Financial entities, other than microenterprises, shall on a regular basis, and at least yearly, conduct a specific ICT risk assessment on all legacy ICT systems and, in any case before and after connecting technologies, applications or systems.	Functional	intersects with	Technical Debt Reviews	SEA-02.3	Mechanisms exist to conduct ongoing "technical debt" reviews of hardware and software technologies to remediate outdated and/or unsupported technologies.	5	
Article 9.1	N/A	For the purposes of adequately protecting ICT systems and with a view to organising response measures, firancial entities shall continuously monitor and control the security and functioning of CT systems and tools and shall minimise the impact of ICT visc on ICT systems through the deployment of appropriate ICT security tools, policies and procedures.	Functional	subset of	Operations Security	OPS-01	Mechanisms exist to facilitate the implementation of operational security controls.	10	
Article 9.1	N/A	For the purposes of adequately protecting ICT systems and with a view to organising response measures, financial entities shall continuously monitor and control the security and functioning of CT systems and tools and shall minimise the impact of ICT is no ICT systems through the deployment of appropriate ICT security tools, policies and procedures.	Functional	intersects with	Security Concept Of Operations (CONOPS)	OPS-02	Mechanisms exist to develop a security Concept of Operations (CONOPS), or a similarly-defined plan for achieving cybersecurity objectives, that documents management, operational and technical measures implemented to apply defense-in- depth techniques that is communicated to all appropriate stakeholders.	5	
Article 9.1	N/A	For the purposes of adequately protecting ICT systems and with a view to organising response measures, financial entities shall continuously monitor and control the security and functioning of CT systems and tools and shall minimise the impact of ICT is do nICT systems through the deployment of appropriate ICT security tools, policies and procedures.	Functional	intersects with	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service management to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting business functions, workforce, and/or customers based on industry-recognized standards to achieve the specific goals of the process area.	5	
Article 9.2	N/A	Financial entities shall design, procure and implement ICT security policies, procedures, protocols and tools that aim to ensure the resilience, continuity and availability of ICT systems, in particular for those supporting critical or important functions, and to maintain high standards of availability, authenticity, integrity and confidentiality of data, whether at rest, in use or in transit.	Functional	intersects with	Operations Security	OPS-01	Mechanisms exist to facilitate the implementation of operational security controls.	5	
Article 9.2	N/A	Transcile entrities shall design, procure and implement ICT security policies, procedures, protocols and toods that aim to ensure the resilience, continuity and availability of ICT systems. In particular for those supporting critical or important functions, and to maintain high standards of availability, authenticity, integrity and confidentiality of data, whether at rest, in use or in transit.	Functional	intersects with	Standardized Operating Procedures (SOP)	OPS-01.1	Mechanisms exist to identify and document Standardized Operating Procedures (SOP), or similar documentation, to enable the proper execution of day-to-day / assigned tasks.	5	
Article 9.2	N/A	Financial entities shall design, procure and implement ICT security policies, procedures, protocols and tools that aim to ensure the resilience, continuity and availability of ICT systems, in particular for those supporting critical or important functions, and to maintain high standards of availability, authenticity, integrity and confidentiality of data, whether at rest, in use or in transit.	Functional	intersects with	Security Concept Of Operations (CONOPS)	OPS-02	Mechanisms exist to develop a security Concept of Operations (CONOPS), or a similarly-defined plan for achieving cybersecurity objectives, that documents management, operational and technical measures implemented to apply defense-in- depth techniques that is communicated to all appropriate stakeholders.	5	
Article 9.2	N/A	Financial entities shall design, procure and implement ICT security policies, procedures, protocols and tools that aim to ensure the resilience, continuity and availability of ICT systems, in particular for those supporting critical or important functions, and to maintain high standards of availability, authenticity, integrity and confidentiality of data, whether at rest, in use or in transit.	Functional	intersects with	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service menagement to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting business functions, workforce, and/or customers based on industry-recognized standards to achieve the specific goals of the process area.	5	
Article 9.3	N/A	In order to achieve the objectives referred to in paragraph 2, financial entities shall use ICT solutions and processes that are appropriate in accordance with Article 4. Those ICT solutions and processes shall:	Functional	intersects with	Operationalizing Cybersecurity & Data Protection Practices	GOV-15	Mechanisms exist to compel data and/or process owners to operationalize cybersecurity & data privacy practices for each system, application and/or service under their control.	5	
Article 9.3(a)	N/A	ensure the security of the means of transfer of data; ensure the security of the means of transfer of data:	Functional	intersects with	Configuration Management Program	CFG-01	Mechanisms exist to facilitate the implementation of configuration management controls. Mechanisms exist to develop, document and maintain secure baseline	5	
Article 9.3(a)	N/A		Functional	intersects with	System Hardening Through Baseline Configurations	CFG-02	configurations for technology platforms that are consistent with industry-accepted system hardening standards.	5	
Article 9.3(a)	N/A	ensure the security of the means of transfer of data;	Functional	intersects with	Secure Engineering Principles	SEA-01	Mechanisms exist to facilitate the implementation of industry-recognized cybersecurity & data privacy practices in the specification, design, development, implementation and modification of systems and services.	5	
Article 9.3(a)	N/A	ensure the security of the means of transfer of data;	Functional	intersects with	Alignment With Enterprise Architecture	SEA-02	Mechanisms exist to develop an enterprise architecture, aligned with industry- recognized leading practices, with consideration for cybersecurity & data privacy principles that addresses risk to organizational operations, assets, individuals, other organizations.	5	
Article 9.3(a)	N/A	ensure the security of the means of transfer of data;	Functional	intersects with	Defense-In-Depth (DiD) Architecture	SEA-03	Mechanisms exist to implement security functions as a layered structure minimizing interactions between layers of the design and svoiding any dependence by lower layers on the functionality or correctness of higher layers.	5	
Article 9.3(b)	N/A	minimise the risk of corruption or loss of data, unauthorised access and technical flaws that may hinder business activity;	Functional	intersects with	Configuration Management Program	CFG-01	Mechanisms exist to facilitate the implementation of configuration management controls.	5	
Article 9.3(b)	N/A	minimise the risk of corruption or loss of data, unauthorised access and technical flaws that may hinder business activity;	Functional	intersects with	System Hardening Through Baseline Configurations	CFG-02	Mechanisms exist to develop, document and maintain secure baseline configurations for technology platforms that are consistent with industry-accepted system hardening standards.	5	
Article 9.3(b)	N/A	minimise the risk of corruption or loss of data, unauthorised access and technical flaws that may hinder business activity;	Functional	intersects with	Secure Engineering Principles	SEA-01	Mechanisms exist to facilitate the implementation of industry-recognized cybersecurity & data privacy practices in the specification, design, development, implementation and modification of systems and services.	5	
Article 9.3(b)	N/A	minimise the risk of corruption or loss of data, unauthorised access and technical flaws that may hinder business activity;	Functional	intersects with	Alignment With Enterprise Architecture	SEA-02	Mechanisms exist to develop an enterprise architecture, aligned with industry- recognized leading practices, with consideration for cybersecurity & data privacy principles that addresses risk to organizational operations, assets, individuals, other organizations.	5	
Article 9.3(b)	N/A	minimise the risk of corruption or loss of data, unauthorised access and technical flaws that may hinder business activity;	Functional	intersects with	Defense-In-Depth (DiD) Architecture	SEA-03	Mechanisms exist to implement security functions as a layered structure minimizing interactions between layers of the design and avoiding any dependence by lower layers on the functionality or correctness of higher layers.	5	
Article 9.3(c)	N/A	prevent the lack of availability, the impairment of the authenticity and integrity, the breaches of confidentiality and the loss of data; prevent the lack of availability, the impairment of the authenticity and integrity, the breaches	Functional	intersects with	Configuration Management Program System Hardening	CFG-01	Mechanisms exist to facilitate the implementation of configuration management controls. Mechanisms exist to develop, document and maintain secure baseline	5	
Article 9.3(c)	N/A	prevent the lack of availability, the impairment of the authenticity and integrity, the breaches of confidentiality and the loss of data; prevent the lack of availability, the impairment of the authenticity and integrity, the breaches	Functional	intersects with	Through Baseline Configurations	CFG-02	Mechanisms exist to develop, document and maintain secure baseline configurations for technology platforms that are consistent with industry-accepted system hardening standards. Article 9.4	N/A	As part of the ICT risk management framework referred to in Article 6(1), financial entities shall:	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
Article 9.4(a)	N/A	develop and document an information security policy defining rules to protect the availability, authenticity, integrity and confidentiality of data, information assets and ICT assets, including those of their customers, where applicable;	Functional	intersects with	Publishing Cybersecurity & Data Protection Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate cybersecurity & data protection policies, standards and procedures.	5	
Article 9.4(b)	N/A	following a risk-based approach, establish a sound network and infrastructure management structure using appropriate techniques, methods and protocols that may include implementing automated mechanisms to isolate affected information assets in the event of cyber-attacks;	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy-related incidents.	10	
Article 9.4(b)	N/A	following a risk-based approach, establish a sound network and infrastructure management structure using appropriate techniques, methods and protocols that may include implementing automated mechanisms to isolate affected information assets in the event of cyber-attacks;	Functional	intersects with	Incident Handling	IRO-02	Mechanisms exist to cover: (1) Preparation; (2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (5) Endication; and (6) Recovery.	5	
Article 9.4(b)	N/A	following a risk-based approach, establish a sound network and infrastructure management structure using appropriate techniques, methods and protocols that may include implementing automated mechanisms to isolate affected information assets in the event of cyber-attacks;	Functional	intersects with	Automated Incident Handling Processes	IRO-02.1	Automated mechanisms exist to support the incident handling process.	5	
Article 9.4(b)	N/A	following a risk-based approach, establish a sound network and infrastructure management structure using appropriate techniques, methods and protocols that may include implementing automated mechanisms to isolate affected information assets in the event of cyber-attacks;	Functional	intersects with	Automatic Disabling of System	IRO-02.6	Mechanisms exist to automatically disable systems, upon detection of a possible incident that meets organizational criteria, which allows for forensic analysis to be performed.	5	
Article 9.4(c)	N/A	implement posicies that limit the physical or logical access to information assets and ICT assets to what is required for legitimate and approved functions and activities only, and establish to that end a set of policies, procedures and controls that address access rights and ensure a sound administration thereof;	Functional	intersects with	Least Privilege	IAC-21	Mechanisms exist to utilize the concept of least privilege, allowing only authorized access to processes necessary to accomplish assigned tasks in accordance with organizational business functions.	5	
Article 9.4(d)	N/A	implement policies and protocols for strong authentication mechanisms, based on relevant standards and dedicated control systems, and protection measures of cryptographic keys whereby data is encrypted based on results of approved data classification and ICT risk assessment processes;	Functional	intersects with	Publishing Cybersecurity & Data Protection Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate cybersecurity & data protection policies, standards and procedures.	5	
Article 9.4(d)	N/A	implement policies and protocols for strong authentication mechanisms, based on relevant standards and dedicated control systems, and protection measures of cryptographic keys whereby data is encrypted based on results of approved data classification and ICT risk assessment processes;	Functional	intersects with	Identity & Access Management (IAM)	IAC-01	Mechanisms exist to facilitate the implementation of identification and access management controls.	5	
Article 9.4(e)	N/A	implement documented policies, procedures and controls for ICT Change management, including changes to ofhware, hardware, firmware components, systems or security parameters, that are based on a risk assessment approach and are an integral part of the financial entity's owned change to a result of the control of the con	Functional	subset of	Change Management Program	CHG-01	Mechanisms exist to facilitate the implementation of a change management program.	10	
Article 9.4(e)	N/A	Implement documented policies, procedures and controls for ICT change management, including changes to software, hardware, firmware components, systems or security parameters, that are based on a risk assessment approach and are an integral part of the financial entity's overall change management process, in order to ensure that all changes to ICT systems are recorded, tested, assessed, approved, implemented and verified in a	Functional	intersects with	Configuration Change Control	CHG-02	Mechanisms exist to govern the technical configuration change control processes.	5	
Article 9.4(e)	N/A	controlled manner: implement documented policies, procedures and controls for ICT change management, including changes to eithwave, hardwave, firmwave components, systems or security parameters. Intil are based on an ist assessment approach and are an integral part of the to CT system are recorded, tested, assessed, approved, implemented and verified in a controlled manner.	Functional	intersects with	Publishing Cybersecurity & Data Protection Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate cybersecurity & data protection policies, standards and procedures.	5	
Article 9.4(e)	N/A	implement documented policies, procedures and controls for ICT change management, including changes to ofhware, Increase, Firmware components, systems or security parameters, that are based on a risk assessment approach and are an integral part of the financial entity's owned change management process, in order to ensure that all changes to ICT systems are recorded, tested, assessed, approved, implemented and verified in a controlled management.	Functional	intersects with	Standardized Operating Procedures (SOP)	OPS-01.1	Mechanisms exist to identify and document Standardized Operating Procedures (SOP), or similar documentation, to enable the proper execution of day-to-day / assigned tasks.	5	
Article 9.4(f)	N/A	have appropriate and comprehensive documented policies for patches and updates.	Functional	intersects with	Publishing Cybersecurity & Data Protection Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate cybersecurity & data protection policies, standards and procedures.	5	
Article 9.4(f)	N/A	have appropriate and comprehensive documented policies for patches and updates.	Functional	subset of	Vulnerability & Patch Management Program (VPMP)	VPM-01	Mechanisms exist to facilitate the implementation and monitoring of vulnerability management controls.	10	
Article 9.4(f)	N/A	have appropriate and comprehensive documented policies for patches and updates.	Functional	intersects with	Software & Firmware Patching	VPM-05	Mechanisms exist to conduct software patching for all deployed operating systems, applications and firmware.	5	
Article 9 (end)	N/A	For the purposes of the first subparagnaph, point (b), financial entities shall design the network connection infrastructure in a wyth tallows it to eniantamenously severed or segmented in order to minimise and prevent contagion, especially for interconnected financial processes. For the purposes of the first subparagnaph, point (e), the ICT change management process shall be approved by appropriate lines of management and shall have specific protocols in	Functional	subset of	Secure Engineering Principles	SEA-01	Mechanisms exist to facilitate the implementation of industry-recognized cybersecurity & dairy-invary practices in the specification, design, development, implementation and modification of systems and services.	10	
Article 10.1	N/A	place. Financial entities shall have in place mechanisms to promptly detect anomalous activities, in accordance with Article 17; including ICT network performance issues and ICT-related unicidents, and to learning potential material single points of finalus. All detection mechanisms selered to in the first subparagraph shall be regularly tested in accordance with Article 26.	Functional	intersects with	Anomalous Behavior	MON-16	Mechanisms exist to detect and respond to anomalous behavior that could indicate account compromise or other malicious activities.	5	
Article 10.2	N/A	The detection mechanisms referred to in paragraph 1 shall enable multiple layers of control, define alert thresholds and criteria to trigger and initiate ICT-related incident response processes, including automatic alert mechanisms for relevant staff in charge of ICT-related incident response.	Functional	intersects with	Network Intrusion Detection / Prevention Systems (NIDS / NIPS)	NET-08	Mechanisms exist to employ Network Intrusion Detection / Prevention Systems (NIDS/NIPS) to detect and/or prevent intrusions into the network.	5	
Article 10.3	N/A	Financial entities shall devote sufficient resources and capabilities to monitor user activity, the occurrence of ICT anomalies and ICT-related incidents, in particular cyber-attacks.	Functional	subset of	Continuous Monitoring	MON-01	Mechanisms exist to facilitate the implementation of enterprise-wide monitoring controls.	10	
Article 10.4	N/A	Data reporting service providers shall, in addition, have in place systems that can effectively check trade reports for completeness, identify omissions and obvious errors, and request re-	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 11.1	N/A	Insammission of those reports. As pand of the CT insk management framework referred to in Article 6(1) and based on the identification requirements set out in Article 8, financial entities shall put in place a comprehensive IT business continuity policy, which may be adopted as a dedicated specific policy, forming an integral part of the overall business continuity policy of the financial entity.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.2	N/A	Financial entities shall implement the ICT business continuity policy through dedicated, appropriate and documented arrangements, plans, procedures and mechanisms aiming to:	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.2(a)	N/A	ensure the continuity of the financial entity's critical or important functions;	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.2(b)	N/A	quickly, appropriately and effectively respond to, and resolve, all ICT-related incidents in a way that limits damage and prioritises the resumption of activities and recovery actions;	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.2(c)	N/A	activate, without delay, dedicated plans that enable containment measures, processes and technologies suited to each type of ICT-related incident and prevent further damage, as well as tailored response and recovery procedures established in accordance with Article 12;	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.2(d)	N/A	estimate preliminary impacts, damages and losses;	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.2(e)	N/A	set out communication and crisis management actions that ensure that updated information is transmitted to all relevant internal staff and external stakeholders in accordance with Article 14, and report to the competent authorities in accordance with Article 19.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.3	N/A	As part of the ICT risk management framework referred to in Article 6(1), financial entities shall implement associated ICT response and recovery plans which, in the case of financial entities other than microenterprises, shall be subject to independent internal audit reviews.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.4	N/A	Financial entities shall put in place, maintain and periodically test appropriate ICT business continuity plans, notably with regard to critical or important functions outsourced or contracted through arrangements with ICT third-party service providers.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
Article 11.4	N/A	Financial entities shall put in place, maintain and periodically test appropriate ICT business continuity plans, notably with regard to critical or important functions outsourced or contracted through arrangements with ICT third-party service providers.	Functional	intersects with	Contingency Plan Testing & Exercises	BCD-04	Mechanisms exist to conduct tests and/or exercises to evaluate the contingency plan's effectiveness and the organization's readiness to execute the plan.	5

Article 13.3	N/A	Articles 26 and 27 and from neal title ICT-related incidents, in particular cyber-staticks, along with challenges feed upon the activation of ICT business continuity plans and ICT response and recovery plans, together with relevant information exchanged with counterparts and assessed during pervisory reviews, and the duly incorporated on a continuous basis into the ICT six assessment process. Those findings shall from the basis for appropriate reviews or relevant components of the ICT six assessment process. Those findings shall from the basis for appropriate reviews or relevant components of the ICT six anagement framework referred to in Article (q1).	Functional	intersects with	Contingency Plan Root Cause Analysis (RCA) & Lessons Learned	BCD-05	activity every time the contingency plan is activated.	5	
		Lessons derived from the digital operational resilience testing carried out in accordance with Articles 26 and 27 and from real life ICT-related incidents, in particular cyber-attacks, along					Mechanisms exist to incorporate lessons learned from analyzing and resolving cybersecurity & data privacy incidents to reduce the likelihood or impact of future		
Article 13.3	N/A	with challenges faced upon the activation of ICT business confinuity plans and ICT response and recovery plans, together with relevant information exchanged with counterparts and assessed during supervisory reviews, shall be duly incorporated on a continuous basis into the ICT risk assessment process. Those findings shall form the basis for appropriate reviews of relevant components of the ICT risk management farmwork referred to In Article 6(1).	Functional	intersects with	Root Cause Analysis (RCA) & Lessons Learned	IRO-13	incidents.	5	
Article 13.4	N/A	Financial ertitles shall monitor the effectiveness of the implementation of their digital operational estilence strategy are out in Article 8(8). They shall map the evolution of IOT risk operational estilence strategy are out in Article 8(8). They shall map the evolution of IOT risk operations of the extension	Functional	intersects with	Measures of Performance	GOV-05	Mechanisms exist to develop, report and monitor cybersecurity & data privacy program measures of performance.	5	
Article 13.5	N/A	Senior ICT staff shall report at least yearly to the management body on the findings referred to in paragraph 3 and put forward recommendations.	Functional	subset of	Status Reporting To Governing Body	GOV-01.2	Mechanisms exist to provide governance oversight reporting and recommendations to those entrusted to make executive decisions about matters considered material to the organization's cybersecurity & data protection program.	10	
Article 13.6	N/A	Financial entities shall develop ICT security awareness programmes and digital operational resilience training as compulsory modules in their staff training schemes. Those programmes and training shall be applicable to all employees and to senior management staff, and shall have a level of complexity commensurate to the remit of their functions. Where appropriate, financial entities shall also include ICT third-party service providers in their relevant training schemes in accordance with Article 30(2), point (I).	Functional	subset of	Cybersecurity & Data Privacy-Minded Workforce	SAT-01	Mechanisms exist to facilitate the implementation of security workforce development and awareness controls.	10	
Article 13.6	N/A	Financial entities shall develop ICT security awareness programmes and digital operational resilience training as compulsory modules in their staff training schemes. Those programmes and training shall be opticable to all employees and to senior management staff, and shall have a level of complexity commensurate to the remit of their functions. Where appropriate, financial entities shall also include ICT third party service providers in their relevant training schemes in accordance with Article 30(2), point (i).	Functional	intersects with	Cybersecurity & Data Privacy Awareness Training	SAT-02	Mechanisms exist to provide all employees and contractors appropriate awareness education and training that is relevant for their job function.	5	
Article 13.6	N/A	Financial entities shall develop ICT security awareness programmes and digital operational resilience training as computory modules in their staff training schemes. Those programmes and training shall be oppicately to all employees and to serior management staff, and shall have a level of complexity commensurate to the remit of their functions. Where appropriate, financial entities and tale sin cludle ST fitting-party service providers in their relevant training schemes in accordance with Article 30(2), point (i).	Functional	intersects with	Role-Based Cybersecurity & Data Privacy Training	SAT-03	Mechanisms exist to provide role-based cybersecurity & data privacy-related training: (I) Before authorizing access to the system or performing assigned duties; (2) When required by system changes; and (3) Annually thereafter.	5

Functional	intersects with	Cyber Threat Environment	SAT-03.6	training that is current and relevant to the cyber threats that users might encounter in day-to-day business operations.	5	
Article 13.7	N/A	Financial entities, other than microenterprises, shall monitor relevant technological developments on a continuous basis, show that view to understanding the possible impact of the deployment of such new technologies on ICT security requirements and digital operational resilience. They shall keep up-to-date with the letter ICT risk management processes, in order to effectively combat current or new forms of cyber-attacks.	Functional	subset of	Technology Development & Acquisition	TDA-01	Mechanisms exist to facilitate the implementation of tailored development and acquisition strategies, contract tools and procurement methods to meet unique business needs.	10	
Article 13.7	N/A	Financial entities, other than microenterprises, shall monitor relevant technological where the continuous basis, loss with a view to understanding the possible impact of the deployment of such new technologies on ICT occurity requirements and digital operational resilience. They shall keep up-to-date with the lettest ICT risk management processes, in order to effectively combat current or new forms of cyber-attacks.	Functional	intersects with	Product Management	TDA-01.1	Machanisms exist to design and implament product management processes to proactively govern the design, development and production of products and/or services across the System Development Life Cycle (SDLC) to: (1) Improve hunchionality. 2) Enhance security and realitency capabilities; (3) Cornect security deficiencies; and (4) Conform with applicable statutory, regulatory and/or contractual obligations.	5	
Article 14.1	N/A	As part of the ICT risk management framework referred to in Article 6(1), financial entities shall have in place crisis communication plans enabling a responsible disclosure of, at least, major ICT-related incidents or vulnerabilities to clients and counterparts as well as to the public, as appropriate.	Functional	intersects with	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents.	5	
Article 14.1	N/A	As part of the Cf risk management framework referred to in Article 6(1), financial entities shall have in place crisis communication plans enabling a responsible disclosure of, at least, major ICT-related incidents or vulnerabilities to clients and counterparts as well as to the public, as appropriate.	Functional	intersects with	Incident Handling	IRO-02	Mechanisms exist to cover: (1) Preparation; (2) Automated event detection or manual incident report intake; (3) Automated (4) Containment; (5) Endication; and (6) Recovery.	5	
Article 14.1	N/A	As part of the ICT risk management framework referred to in Article 6(1), financial entities shall have in place crisis communication plans enabling a responsible disclosure of, at least, major ICT-related incidents or vulnerabilities to clients and counterparts as well as to the public, as appropriate.	Functional	intersects with	Integrated Security Incident Response Team (ISIRT)	IRO-07	Mechanisms exist to establish an integrated team of cybersecurity, IT and business function representatives that are capable of addressing cybersecurity & data privacy incident response operations.	5	
Article 14.1	N/A	As part of the ICT risk management framework referred to in Article 6(1), financial entities shall have in place crisis communication plans enabling a responsible disclosure of, at least, major ICT-related incidents or vulnerabilities to clients and counterparts as well as to the public, as appropriate.	Functional	intersects with	Incident Stakeholder Reporting	IRO-10	Mechanisms exist to timely-report incidents to applicable: (1) Internal stakeholders; (2) Affected clients & third-parties; and (3) Regulatory authorities.	5	
Article 14.1	N/A	As part of the ICT risk management framework reterred to in Article 6(1), financial entities shall have in place crisis communication plans enabling a responsible disclosure of, at least, major ICT-related incidents or vulnerabilities to clients and counterparts as well as to the public, as appropriate.	Functional	intersects with	Incident Reporting Assistance	IRO-11	Mechanisms exist to provide incident response advice and assistance to users of systems for the handling and reporting of actual and potential cybersecurity & data privacy incidents.	5	
Article 14.2	N/A	As part of the ICT risk management framework, financial entities shall implement communication policies for internal staff and for external stakeholders. Communication policies for staff shall take into account the need to differentiate between staff involved in ICT risk management, in particular the staff responsible for response and recovery, and staff that needs to be informed.	Functional	intersects with	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy-related incidents.	5	
Article 14.2	N/A	As part of the ICT risk management transverk, financial entities shall implement communication policies for internal start and for external stakeholders. Communication policies for staff shall take into account the need to differentiate between staff involved in ICT risk management, in particular the staff responsible for response and recovery, and staff that needs to be informed.	Functional	intersects with	Incident Handling	IRO-02	Mechanisms exist to cover: () Preparation: () Automated event detection or manual incident report intake; () Analysis; (4) Costaliminent: (6) Endication; and (6) Recovery.	5	
Article 14.2	N/A	As part of the ICT risk management framework, financial entities shall implement communication policies for internal staff and for external stakeholders. Communication policies for staff shall take into account the need to differentiate between staff involved in ICT risk management, in particular the staff responsible for response and recovery, and staff that needs to be informed.	Functional	intersects with	Integrated Security Incident Response Team (ISIRT)	IRO-07	Mechanisme exist to establish an integrated team of cybersecurity, IT and business function representatives that are capable of addressing cybersecurity & data privacy incident response operations.	5	
Article 14.2	N/A	As part of the ICT risk management framework, financial entities shall implement communication policies for internal staff and for external stakeholders. Communication policies for staff shall take into account the need to differentiate between staff involved in ICT risk management, in particular the staff responsible for response and recovery, and staff that needs to be informed.	Functional	intersects with	Incident Stakeholder Reporting	IRO-10	Mechanisms exist to timely-report incidents to applicable: (1) Internal stakeholders; (2) Affected clients & third-parties; and (3) Regulatory authorities.	5	
Article 14.2	N/A	As part of the ICT risk management framework, financial entities shall implement communication policies for internal staff and for external stakeholders. Communication policies for staff shall take into account the need to differentiate between staff involved in ICT risk management, in particular the staff responsible for response and recovery, and staff that needs to be informed.	Functional	intersects with	Incident Reporting Assistance	IRO-11	Mechanisms exist to provide incident response advice and assistance to users of systems for the handling and reporting of actual and potential cybersecurity & data privacy incidents.	5	
Article 14.3	N/A	At teast one person in the financial entity shall be tasked with implementing the communication strategy for ICT- related incidents and fulfil the public and media function for that purpose.	Functional	intersects with	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents.	5	
Article 14.3	N/A	At least one person in the financial entity shall be leaked with implementing the communication strategy for ICT- related incidents and fulfil the public and media function for that purpose.	Functional	intersects with	Incident Handling	IRO-02	Mechanisms exist to cover: (1) Preparation; (2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (5) Endication; and (6) Recovery.	5	
Article 14.3	N/A	At least one person in the financial entity shall be tasked with implementing the communication strategy for ICT- related incidents and fulfil the public and media function for that purpose.	Functional	intersects with	Integrated Security Incident Response Team (ISIRT)	IRO-07	Mechanisms exist to establish an integrated team of cybersecurity, IT and business function representatives that are capable of addressing cybersecurity & data privacy incident response operations.	5	
Article 14.3	N/A	At least one person in the financial entity shall be tasked with implementing the communication strategy for ICT- related incidents and fulfil the public and media function for that purpose.	Functional	intersects with	Incident Stakeholder Reporting	IRO-10	Mechanisms exist to timely-report incidents to applicable: (1) Internal stakeholders; (2) Affected clients & third-parties; and (3) Regulatory authorities.	5	
Article 14.3	N/A	At least one person in the financial entity shall be tasked with implementing the communication strategy for ICT- related incidents and fulfil the public and media function for that purpose.	Functional	intersects with	Incident Reporting Assistance	IRO-11	Mechanisms exist to provide incident response advice and assistance to users of systems for the handling and reporting of actual and potential cybersecurity & data privacy incidents.	5	
Article 15	N/A	The ESAs shall, through the Joint Committee, in consultation with the European Union Agency on Cybersecurity (ENISA), develop common draft regulatory technical standards in order to:	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15(a)	N/A	specify further elements to be included in the CT security policies, procedures, protocols and tools referred to in Article 9(2), which we've to ensuring the security of retworks, enable adequate sargequets against intrusions and data misuse, preserve the availability, authenticity, integrity and confidentiality of data, including cyprographic techniques, and guarantee an accurate and prompt data transmission without major disruptions and undue delayer;	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15(b)	N/A	develop further components of the controls of access management rights referred to in Article 9(4), point (e), and associated human resource policy specifying access rights, procedures for granting and revolving rights, monitoring anomalous behaviour in relation to ICT risk through appropriate indicators, including for network use patterns, hours, IT activity and unknown devices.	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15(c)	N/A	develop further the mechanisms specified in Article 10(1) enabling a prompt detection of anomalous activities and the criteria set out in Article 10(2) triggering ICT-related incident detection and response processes;	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15(d)	N/A	specify further the components of the ICT business continuity policy referred to in Article 11(1);	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15(e)	N/A	specify urther the testing of ICT business continuity plans referred to in Article 11(6) to ensure that such testing duty bases into accounts exensing with which the quality of the provision of a critical or important function deteriorates to an unacceptable level or falls, and duty considers the operational impact of the insolvency, or offer failuses, of any relevant ICT third-party service provider and, where relevant, the political risks in the respective providers' jurisdictions;	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15(f)	N/A	specify further the components of the ICT response and recovery plans referred to in Article 11(3);	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15(g)	N/A	specifying further the content and format of the report on the review of the ICT risk management framework referred to in Article 6(5);	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 15 (end)	N/A	When developing those draft regulatory technical standards, the ESAs shall size into account the size and the overall risk profile of the financial entity, and the nature, scale and complexity of its services, activities and operations, while duly taking into consideration any specific feature arising from the distinct nature of activities across different financial standards from the size of activities across different financial standards to the Commission by 17 January 2024. The ESAs shall submit those draft regulatory technical standards to the Commission by 17 January 2024. Rower is designated to the Commission to supplement this Regulation by adopting the regulatory technical standards referred to in the first paragraph in accordance with Articles 10 to 14 of Regulations (EU) No 1083/2010, (EU) No 1084/2010 and (EU) No 1085/2010.	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 16.1	N/A	Articles 1s to 15 of this Regulation shall not apply to small and non-interconnected investment firms, payment institutions exempted required to Discrete (EQ 1015/236), institutions exempted pursuant to Directive 2013/30/EU in respect of which Member States have decided not to apply the option referred to in Article 2(pl of this Regulation; electronic more institutions exempted pursuant to Directive 2009/110/EC; and small institutions for occupational retirement provision. Without prejudice to the first subparagraph, the entities issted in the first subparagraph shall:	Functional	no relationship	N/A	N/A	N/A	N/A

Article 16.1(b)	N/A	continuously monitor the security and functioning of all ICT systems; minimise the impact of ICT risk through the use of sound, resilient and updated ICT systems,	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls. Mechanisms exist to facilitate the implementation of cybersecurity & data	10	
Article 16.1(c)	N/A	protocols and tools which are appropriate to support the performance of their activities and the provision of services and adequately protect availability, authenticity, integrity and confidentiality of data in the network and information systems;	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	protection governance controls.	10	
Article 16.1(d)	N/A	allow sources of ICT risk and anomalies in the network and information systems to be promptly identified and detected and ICT-related incidents to be swiftly handled;	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
Article 16.1(e)	N/A	identify key dependencies on ICT third-party service providers;	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
Article 16.1(f)	N/A	ensure the continuity of critical or important functions, through business continuity plans and response and recovery measures, which include, at least, back-up and restoration measures;	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
Article 16.1(g)	N/A	test, on a regular basis, the plans and measures referred to in point (f), as well as the effectiveness of the controls implemented in accordance with points (a) and (c);	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
Article 16.1(h)	N/A	implement, as appropriate, relevant operational conclusions resulting from the tests referred to in point (g) and from post-incident analysis into the ICT risk assessment process and develop, according to needs and ICT risk profile, ICT security awareness programmes and digital operational resilience training for staff and management.	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
Article 16.2	N/A	The ICT isk management framework referred to in paragraph 1, second subparagraph, point (a), shall be documented and reviewee periodically and upon the occurrence or major ICT- related incidents in compliance with supervisery instructions. It shall be continuously improved on the basis of lessons derived from implementation and monitoring. A report on the review of the ICT risk management framework shall be submitted to the competent authority upon its request.	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
Article 16.3	N/A	The ESAs shall, through the Joint Committee, in consultation with the ENISA, develop common draft regulatory technical standards in order to: specify further the elements to be included in the ICT risk management framework referred to	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 16.2(a)	N/A	in paragraph 1, second subparagraph, point (a); specify further the elements in relation to systems, protocols and tools to minimise the	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 16.2(b)	N/A	impact of ICT fisk referred to in paragraph 1, second subparagraph, point (c), with a view to ensuring the security of networks, enabling adequate safeguards against intrusions and data misuse and preserving the availability, authenticity, Integrity and confidentiality of data; specify further the components of the ICT business continuity plans referred to in paragraph	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 16.2(c)	N/A	second subparagraph, point (f); specify further the rules on the testing of business continuity plans and ensure the	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 16.2(d)	N/A	effectiveness of the controls referred to in paragraph 1, second subparagraph, point (g) and ensure that such testing duly takes into account scenarios in which the quality of the provision of a critical or important function deteriorates to an unacceptable level or fails;	Functional	no relationship	N/A	N/A	N/A	N/A	
Article 16.2(e)	N/A	specify further the content and format of the report on the review of the ICT risk management framework referred to in paragraph 2. When developing those draft regulatory technical standards, the ESAs shall take into account	Functional	no relationship	N/A	N/A	N/A	N/A	
		when developing mose draft regulatory technical standards, the EDA'S shall take into account the size and the overall risk profile of the financial entity, and the nature, scale and complexity of its services, activities and operations.							
Article 16.2(end)	N/A	The ESAs shall submit those draft regulatory technical standards to the Commission by 17 January 2024.	Functional	no relationship	N/A	N/A	N/A	N/A	
		Power is delegated to the Commission to supplement this Regulation by adopting the regulatory technical standards referred to in the first subparagraph in accordance with Articles 10 to 14 of Regulations (EU) No 1093/2010, (EU) No 1094/2010 and (EU) No 1095/2010.							
Article 17.1	N/A	Financial entities shall define, establish and implement an ICT-related incident management process to detect, manage and notify ICT-related incidents.	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy-related incidents.	10	
Article 17.1	N/A	Financial entities shall define, establish and implement an ICT-related incident management process to detect, manage and notify ICT-related incidents.	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable Incident Response Plan (IRP) to all stakeholders.	5	
Article 17.2	N/A	Financial entities shall record all ICT-related incidents and significant cyber threats. Financial entities shall establish appropriate procedures and processes to ensure a consistent and integrated monitoring, handling and follow-up of ICT-related incidents, to ensure that root causes are identified, documented and addressed in order to prevent the occurrence of such incidents.	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy-related incidents.	10	
Article 17.2	N/A	Financial entities shall record all ICT-related incidents and significant opber threats. Financial entities shall establish appropriate procedures and processes to ensure a consistent and integrated monitoring, handling and follow-up of ICT-related incidents, to ensure that root causes are identified, documented and addressed in order to prevent the occurrence of such incidents.	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable incident Response Plan (IRP) to all stakeholders.	5	
Article 17.3	N/A	The ICT-related incident management process referred to in paragraph 1 shall:	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents.	10	
Article 17.3(a)	N/A	put in place early warning indicators;	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents.	10	
Article 17.3(a)	N/A	put in place early warning indicators;	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable Incident Response Plan (IRP) to all stakeholders.	5	
Article 17.3(b)	N/A	establish procedures to identify, track, log, categorise and classify ICT-related incidents according to their priority and severity and according to the criticality of the services impacted, in accordance with the criteria set out in Article 18(1);	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents.	10	
Article 17.3(b)	N/A	establish procedures to identify, track, log, categorise and classify ICT-related incidents according to their priority and severify and according to the criticality of the services impacted, in accordance with the criteria set out in Article 18(1); assign roles and responsibilities that need to be activated for different ICT-related incident	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable incident Response Plan (IRP) to all stakeholders.	5	
Article 17.3(c)	N/A	types and scenarios;	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents.	10	
Article 17.3(c)	N/A	assign roles and responsibilities that need to be activated for different ICT-related incident types and scenarios;	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable Incident Response Plan (IRP) to all stakeholders.	5	
Article 17.3(d)	N/A	set out plans for communication to staff, external stakeholders and media in accordance with Article 14 and for notification to clients, for internal escalation procedures, including ICT- related customer complaints, as well as for the provision of information to financial entities that act as counterparts, as appropriate;	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy-related incidents.	10	
Article 17.3(d)	N/A	set out plans for communication to staff, external stakeholders and media in accordance with Article 14 and for notification to clients, for internal escalation procedures, including ICT- related customer complaints, as well as for the provision of information to financial entities that act as counterparts, as appropriate;	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable Incident Response Plan (IRP) to all stakeholders.	5	
Article 17.3(e)	N/A	ensure that at least major iCT-related incidents are reported to relevant senior management and inform the management body of at least major iCT-related incidents, explaining the impact, response and additional controls to be established as a result of such iCT-related incidents;	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents.	10	
Article 17.3(e)	N/A	ensure that at least major ICT-related incidents are reported to relevant senior management and inform the management body of at least major ICT-related incidents, explaining the impact, response and additional controls to be established as a result of such ICT-related incidents;	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable incident Response Ptan (IRP) to all stakeholders.	5	
Article 17.3(f)	N/A	establish ICT-related incident response procedures to mitigate impacts and ensure that services become operational and secure in a timely manner.	Functional	subset of	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy-related incidents.	10	
Article 17.3(f)	N/A	establish ICT-related incident response procedures to mitigate impacts and ensure that services become operational and secure in a timely manner.	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable Incident Response Plan (IRP) to all stakeholders.	5	
Article 18.1	N/A	Financial entities shall classify KCT-related incidents and shall determine their impact based on the following criteria:	Functional	intersects with	Incident Handling	IRO-02	Mechanisms exist to cover: (1) Preparation: (2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (6) End callor; and (6) Recovery.	5
