FDE#	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF#	Secure Controls Framework (SCF) Control Description	Strength of Relationship (ontional)	Notes (optional)
GV	N/A	The organization's cybersecurity risk management strategy, expectations, and policy are established, communicated, and monitored.	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
GV	N/A	The organization's cybersecurity risk management strategy, expectations, and policy are established, communicated, and monitored.	Functional	intersects with	Measures of Performance	GOV-05	Mechanisms exist to develop, report and monitor cybersecurity & data privacy program measures of performance.	8	
GV	N/A	The organization's cybersecurity risk management strategy, expectations, and policy are established, communicated, and monitored.	Functional	subset of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	10	
GV	N/A	The organization's cybersecurity risk management strategy, expectations, and policy are established, communicated, and monitored.	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
GV.OC	N/A	The circumstances — mission, stakeholder expectations, dependencies, and legal, regulatory, and contractual requirements — surrounding the organization's cybersecurity risk management	Functional	subset of	Defining Business Context & Mission	GOV-08	Mechanisms exist to define the context of its business model and document the organization's mission.	10	
gv.oc	N/A	decisions are understood. The circumstances — mission, stakeholder expectations, dependencies, and legal, regulatory, and contractual requirements — surrounding the organization's cybersecurity risk management decisions are understood.	Functional	intersects with	Asset-Service Dependencies	AST-01.1	Mechanisms exist to identify and assess the security of technology assets that support more than one critical business function.	5	
GV.OC	N/A	The circumstances — mission, stakeholder expectations, dependencies, and legal, regulatory, and contractual requirements — surrounding the organization's cybersecurity risk management decisions are understood.	Functional	intersects with	Stakeholder Identification & Involvement	AST-01.2	Mechanisms exist to identify and involve pertinent stakeholders of critical systems, applications and services to support the ongoing secure management of those assets.	5	
GV.OC	N/A	The circumstances — mission, stakeholder expectations, dependencies, and legal, regulatory, and contractual requirements — surrounding the organization's cybersecurity risk management decisions are understood.	Functional	intersects with	Statutory, Regulatory & Contractual Compliance	CPL-01	Mechanisms exist to facilitate the identification and implementation of relevant statutory, regulatory and contractual controls.	5	
gv.oc	N/A	The circumstances — mission, stakeholder expectations, dependencies, and legal, regulatory, and contractual requirements — surrounding the organization's cybersecurity risk management decisions are understood.	Functional	intersects with	Responsible, Accountable, Supportive, Consulted & Informed (RASCI) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to delineate assignment for cybersecurity & data privacy controls between internal stakeholders and External Service Providers (ESPs).	5	
GV.OC-01	N/A	The organizational mission is understood and informs cybersecurity risk management.	Functional	subset of	Defining Business Context & Mission	GOV-08	Mechanisms exist to define the context of its business model and document the organization's mission.	10	
GV.OC-01	N/A	The organizational mission is understood and informs cybersecurity risk management.	Functional	intersects with	Risk Framing	RSK-01.1	Mechanisms exist to identify: (1) Assumptions affecting risk assessments, risk response and risk monitoring; (2) Constraints affecting risk assessments, risk response and risk monitoring; (3) The organizational risk tolerance; and (4) Priorities, benefits and trade-offs considered by the organization for managing risk.	5	
GV.OC-01	N/A	The organizational mission is understood and informs cybersecurity risk management.	Functional	intersects with	Threat Modeling	TDA-06.2	Mechanisms exist to perform threat modelling and other secure design techniques, to ensure that threats to software and solutions are identified and accounted for.	4	
GV.OC-02	N/A	Internal and external stakeholders are understood, and their needs and expectations regarding cybersecurity risk management are understood and considered.	Functional	intersects with	Stakeholder Identification & Involvement	AST-01.2	Mechanisms exist to identify and involve pertinent stakeholders of critical systems, applications and services to support the ongoing secure management of those assets.	5	
GV.OC-02	N/A	Internal and external stakeholders are understood, and their needs and expectations regarding cybersecurity risk management are understood and considered.	Functional	intersects with	Third-Party Contract Requirements	TPM-05	Mechanisms exist to require contractual requirements for cybersecurity & data privacy requirements with third-parties, reflecting the organization's needs to protect its systems, processes and data.	5	
GV.OC-02	N/A	Internal and external stakeholders are understood, and their needs and expectations regarding cybersecurity risk management are understood and considered.	Functional	intersects with	Responsible, Accountable, Supportive, Consulted & Informed (RASCI) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to delineate assignment for cybersecurity & data privacy controls between internal stakeholders and External Service Providers (ESPs).	5	
GV.OC-03	N/A	Legal, regulatory, and contractual requirements regarding cybersecurity — including privacy and civil liberties obligations — are understood and managed.	Functional	subset of	Statutory, Regulatory & Contractual Compliance	CPL-01	Mechanisms exist to facilitate the identification and implementation of relevant statutory, regulatory and contractual controls.	10	
GV.OC-03	N/A	Legal, regulatory, and contractual requirements regarding cybersecurity — including privacy and civil liberties obligations — are understood and managed.	Functional	intersects with	Cybersecurity & Data Protection Controls Oversight	CPL-02	Mechanisms exist to provide a cybersecurity & data protection controls oversight function that reports to the organization's executive leadership.	5	
GV.OC-03	N/A	Legal, regulatory, and contractual requirements regarding cybersecurity — including privacy and civil liberties obligations — are understood and managed.	Functional	intersects with	Data Privacy Program	PRI-01	Mechanisms exist to facilitate the implementation and operation of data protection controls throughout the data lifecycle to ensure all forms of Personal Data (PD) are processed lawfully, fairly and transparently.	8	
GV.OC-03	N/A	Legal, regulatory, and contractual requirements regarding cybersecurity — including privacy and civil liberties obligations — are understood and managed.	Functional	intersects with	Third-Party Contract Requirements	TPM-05	Mechanisms exist to require contractual requirements for cybersecurity & data privacy requirements with third-parties, reflecting the organization's needs to protect its systems, processes and data.	5	
GV.OC-03	N/A	Legal, regulatory, and contractual requirements regarding cybersecurity — including privacy and civil liberties obligations — are understood and managed.	Functional	intersects with	Contract Flow-Down Requirements	TPM-05.2		5	
GV.OC-04	N/A	Critical objectives, capabilities, and services that external stakeholders depend on or expect from the organization are understood and communicated.	Functional	intersects with	Defining Business Context & Mission	GOV-08	Mechanisms exist to define the context of its business model and document the organization's mission.	5	
GV.OC-04	N/A	Critical objectives, capabilities, and services that external stakeholders depend on or expect from the organization are understood and communicated.	Functional	intersects with	Identify Critical Assets	BCD-02	Mechanisms exist to identify and document the critical systems, applications and services that support essential missions and business functions.	5	
GV.OC-04	N/A	Critical objectives, capabilities, and services that external stakeholders depend on or expect from the organization are understood and communicated.	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1		5	
GV.OC-04	N/A	Critical objectives, capabilities, and services that external stakeholders depend on or expect from the organization are understood and communicated.	Functional	intersects with	Third-Party Criticality Assessments	TPM-02	Mechanisms exist to identify, prioritize and assess suppliers and partners of critical systems, components and services using a supply chain risk assessment process relative to their importance in supporting the delivery of high-value services.	5	
GV.OC-05	N/A	Outcomes, capabilities, and services that the organization depends on are understood and communicated.	Functional	intersects with	Identify Critical Assets	BCD-02	Mechanisms exist to identify and document the critical systems, applications and services that support essential missions and business functions.	5	
GV.OC-05	N/A	Outcomes, capabilities, and services that the organization depends on are understood and communicated.	Functional	intersects with	Software Bill of Metrials (SBOM)	TDA-04.2	Mechanisms exist to generate, or obtain, a Software Bill of Materials (SBOM) for systems, applications and services that lists software packages in use, including versions and applicable licenses.	4	
GV.OC-05	N/A	Outcomes, capabilities, and services that the organization depends on are understood and communicated.	Functional	intersects with	Third-Party Criticality Assessments	TPM-02	Mechanisms exist to identify, prioritize and assess suppliers and partners of critical systems, components and services using a supply chain risk assessment process relative to their importance in supporting the delivery of high-value services.	5	
GV.RM	N/A	The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions.	Functional	intersects with	Assigned Cybersecurity & Data Protection Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterorise-wide cybersecurity & data protection program.	5	
GV.RM	N/A	The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions.	Functional	intersects with	Cybersecurity & Data Privacy Portfolio Management	PRM-01	Mechanisms exist to facilitate the implementation of cybersecurity & data privacy- related resource planning controls that define a viable plan for achieving cybersecurity & data privacy objectives.	5	
GV.RM	N/A	The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions.	Functional	intersects with	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a strategic cybersecurity & data privacy-specific business plan and set of objectives to achieve that plan.	5	
GV.RM	N/A	The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions.	Functional	intersects with	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls. Mechanisms exist to identify:	5	
GV.RM	N/A	The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions.	Functional	intersects with	Risk Framing	RSK-01.1	(1) Assumptions affecting risk assessments, risk response and risk monitoring; (2) Constraints affecting risk assessments, risk response and risk monitoring;	8	
GV.RM	N/A	The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions.	Functional	intersects with	Risk Tolerance	RSK-01.3	Mechanisms exist to define organizational risk tolerance, the specified range of acceptable results.	8	
GV.RM	N/A	The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions.	Functional	intersects with	Risk Appetite	RSK-01.5	Mechanisms exist to define organizational risk appetite, the degree of uncertainty the organization is willing to accept in anticipation of a reward.	8	
GV.RM-01	N/A	Risk management objectives are established and agreed to by organizational stakeholders.	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
GV.RM-01	N/A	Risk management objectives are established and agreed to by organizational stakeholders.	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	10	
GV.RM-01	N/A	Risk management objectives are established and agreed to by organizational stakeholders.	Functional	intersects with	Key Risk Indicators (KRIs)	GOV-05.2	a regular basis. Mechanisms exist to develop, report and monitor Key Risk Indicators (KRIs) to assist senior management in performance monitoring and trend analysis of the cybersecurity & data privacy program.	3	
GV.RM-01	N/A	Risk management objectives are established and agreed to by organizational stakeholders.	Functional	intersects with	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	5	
GV.RM-02	N/A	Risk appetite and risk tolerance statements are established, communicated, and maintained.	Functional	intersects with	Risk Tolerance	RSK-01.3	Mechanisms exist to define organizational risk tolerance, the specified range of acceptable results.	10	

FDE#	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF#	Secure Controls Framework (SCF) Control Description	Strength of Relationship (optional)	Notes (optional)
GV.RM-02	N/A	Risk appetite and risk tolerance statements are established, communicated, and maintained.	Functional	intersects with	Risk Appetite	RSK-01.5	Mechanisms exist to define organizational risk appetite, the degree of uncertainty the organization is willing to accept in anticipation of a reward.	10	
GV.RM-03	N/A	Cybersecurity risk management activities and outcomes are included in enterprise risk management processes.	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
GV.RM-03	N/A	Cybersecurity risk management activities and outcomes are included in enterprise risk management processes.	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on	5	
GV.RM-03	N/A	Cybersecurity risk management activities and outcomes are included	Functional	subset of	Risk Management	RSK-01	a regular basis. Mechanisms exist to facilitate the implementation of strategic, operational and	10	
GV.RM-04	N/A	In enterprise risk management processes. Strategic direction that describes appropriate risk response options is established and communicated.	Functional	subset of	Program Risk Management	RSK-01	tactical risk management controls. Mechanisms exist to facilitate the implementation of strategic, operational and	10	
		established and communicated.			Program		tactical risk management controls. Mechanisms exist to identify: (1) Assumptions affecting risk assessments, risk response and risk monitoring;		
GV.RM-04	N/A	Strategic direction that describes appropriate risk response options is established and communicated.	Functional	intersects with	Risk Framing	RSK-01.1	(1) Assumptions structuring risk assessments, risk response and risk monitoring; (2) Construints affecting risk assessments, risk response and risk monitoring; (3) The organizational risk tolerance; and (4) Priorities, benefits and trade-offs considered by the organization for managing risk.	5	
GV.RM-04	N/A	Strategic direction that describes appropriate risk response options is established and communicated.	Functional	intersects with	Risk Remediation	RSK-06	Mechanisms exist to remediate risks to an acceptable level.	5	
GV.RM-04	N/A	Strategic direction that describes appropriate risk response options is	Functional	superset of	Risk Response	RSK-06.1	Mechanisms exist to respond to findings from cybersecurity & data privacy assessments, incidents and audits to ensure proper remediation has been	5	
GV.RM-04	N/A	established and communicated. Strategic direction that describes appropriate risk response options is	Functional	intersects with	Compensating	RSK-06.2	performed. Mechanisms exist to identify and implement compensating countermeasures to	5	
		established and communicated. Lines of communication across the organization are established for			Countermeasures Assigned Cybersecurity &		reduce risk and exposure to threats. Mechanisms exist to assign one or more qualified individuals with the mission and		
GV.RM-05	N/A	cybersecurity risks, including risks from suppliers and other third parties.	Functional	intersects with	Data Protection Responsibilities	GOV-04	resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide cybersecurity & data protection program.	5	
GV.RM-05	N/A	Lines of communication across the organization are established for cybersecurity risks, including risks from suppliers and other third parties.	Functional	intersects with	Stakeholder Accountability Structure	GOV-04.1	Mechanisms exist to enforce an accountability structure so that appropriate teams and individuals are empowered, responsible and trained for mapping, measuring and managing data and technology-related risks.	5	
GV.RM-05	N/A	Lines of communication across the organization are established for cybersecurity risks, including risks from suppliers and other third parties.	Functional	intersects with	Defined Roles & Responsibilities	HRS-03	Mechanisms exist to define cybersecurity roles & responsibilities for all personnel.	5	
		Lines of communication across the organization are established for			Responsible, Accountable, Supportive,		Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to

ID	N/A	The organization's current cybersecurity risks are understood.	Functional	intersects with	Risk Framing	RSK-01.1	Mechanisms exist to identify: (1) Assumptions affecting risk assessments, risk response and risk monitoring; (2) Constraints affecting risk assessments, risk response and risk monitoring; (3) The organizational risk tolerance; and (4) Priorities, benefits and trade-offs considered by the organization for managing risk.	(optional)	
ID ID	N/A N/A	The organization's current cybersecurity risks are understood. The organization's current cybersecurity risks are understood.	Functional	intersects with	Risk Identification	RSK-03.1	Mechanisms exist to identify and document risks, both internal and external. Mechanisms exist to develop and keep current a catalog of applicable risks associated with the organization's business operations and technologies in use.	5	
ID	N/A	The organization's current cybersecurity risks are understood.	Functional	intersects with	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's systems and data.	5	
ID	N/A	The organization's current cybersecurity risks are understood.	Functional	intersects with	Risk Register	RSK-04.1	Mechanisms exist to maintain a risk register that facilitates monitoring and reporting of risks.	5	
ID	N/A	The organization's current cybersecurity risks are understood.	Functional	intersects with	Risk Ranking	RSK-05	Mechanisms exist to identify and assign a risk ranking to newly discovered security vulnerabilities that is based on industry-recognized practices.	5	
ID	N/A	The organization's current cybersecurity risks are understood.	Functional	intersects with	Supply Chain Risk Management (SCRM) Plan	RSK-09	Mechanisms exist to develop a plan for Supply Chain Risk Management (SCRM) associated with the development, acquisition, maintenance and disposal of systems, system components and services, including documenting selected mitigating actions and monitoring performance against those plans.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	subset of	Asset Governance	AST-01	Mechanisms exist to facilitate an IT Asset Management (ITAM) program to implement and manage asset management controls.	10	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Asset-Service Dependencies	AST-01.1	Mechanisms exist to identify and assess the security of technology assets that support more than one critical business function.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Stakeholder Identification & Involvement	AST-01.2	Mechanisms exist to identify and involve pertinent stakeholders of critical systems, applications and services to support the ongoing secure management of those assets.	5	
ID.AM	N/A	Assets (e.g., data, handware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Asset Inventories	AST-02	Mechanisms exist to perform inventories of technology assets that: (1) Accurately reflects the current systems, applications and services in use; (2) Identifies authorized software products, including business justification details; (3) is at the level of granularity deemed necessary for tracking and reporting; (4) includes organization-defined information deemed necessary to achieve effective property accountability; and (3) is available for review and sault by designated coranizational personnel.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Asset Ownership Assignment	AST-03	Mechanisms exist to ensure asset ownership responsibilities are assigned, tracked and managed at a team, individual, or responsible organization level to establish a common understanding of requirements for asset protection.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Accountability Information	AST-03.1	Mechanisms exist to include capturing the name, position and/or role of individuals responsible/accountable for administering assets as part of the technology asset inventory process.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Human Resources Security Management	HRS-01	Mechanisms exist to facilitate the implementation of personnel security controls.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Defined Roles & Responsibilities	HRS-03	Mechanisms exist to define cybersecurity roles & responsibilities for all personnel.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Terms of Employment	HRS-05	Mechanisms exist to require all employees and contractors to apply cybersecurity & data privacy principles in their daily work.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Rules of Behavior	HRS-05.1	Mechanisms exist to define acceptable and unacceptable rules of behavior for the use of technologies, including consequences for unacceptable behavior.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Physical & Environmental Protections	PES-01	Mechanisms exist to facilitate the operation of physical and environmental protection controls.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Risk-Based Security Categorization	RSK-02	Mechanisms exist to categorize systems and data in accordance with applicable laws, regulations and contractual obligations that: (1) Document the security categorization results (including supporting rationale) in the security plan for systems; and (2) Ensure the security categorization decision is reviewed and approved by the	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organizations is ski strategy.	Functional	intersects with	Third-Party Management	TPM-01	asset owner. Mechanisms exist to facilitate the implementation of third-party management controls.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Third-Party Inventories	TPM-01.1	Mechanisms exist to maintain a current, accurate and complete list of External Service Providers (ESPs) that can potentially impact the Confidentiality, Integrity, Availability and/or Safety (CIAS) of the organization's systems, applications, services and data.	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Responsible, Accountable, Supportive, Consulted & Informed (RASCI) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) martix, or similar documentation, to delineate assignment for cybersecurity & data privacy controls between internal stakeholders and External Service Providers (ESPs).	5	
ID.AM	N/A	Assets (e.g., data, hardware, software, systems, facilities, services, people) that enable the organization to achieve business purposes are identified and managed consistent with their relative importance to organizational objectives and the organization's risk strategy.	Functional	intersects with	Third-Party Personnel Security	TPM-06	Mechanisms exist to control personnel security requirements including security roles and responsibilities for third-party providers.	5	
ID.AM-01	N/A	Inventories of hardware managed by the organization are maintained.	Functional	subset of	Asset Inventories	AST-02	Mechanisms exist to perform inventories of fechnology assets that: (1) Accurately refeat the current systems, applications and services in use; (2) Identifies authorized software products, including business justification details; (3) is at the level of granularity deemed necessary for tracking and reporting; (4) includes organization-defined information deemed necessary to achieve effective property accountability; and first is available for review and audit by designated organizations personnel.	10	
ID.AM-01	N/A	Inventories of hardware managed by the organization are maintained.	Functional	intersects with	Third-Party Inventories	TPM-01.1	Mechanisms exist to maintain a current, accurate and complete list of External Service Providers (ESPs) that can potentially impact the Confidentiality, Integrity, Availability and/or Safety (CIAS) of the organization's systems, applications, services and data.	5	
ID.AM-02	N/A	Inventories of software, services, and systems managed by the organization are maintained.	Functional	subset of	Asset Inventories	AST-02	Mechanisms exist to perform inventories of technology assets that: (1) Accurately reflects the current systems, applications and services in use; (2) Identifies authorized software products, including business justification details; (3) is at the level of granularity deemed necessary for tracking and reporting; (4) includes organization-defined information deemed necessary to achieve effective property accountability; and first in available for review and audit by designated organizations personnel.	10	
ID.AM-02	N/A	Inventories of software, services, and systems managed by the organization are maintained.	Functional	intersects with	Third-Party Inventories	TPM-01.1	Mechanisms exist to maintain a current, accurate and complete list of External Sencice Providere (ESPs) that can potentially impact the Confidentiality, Integrity, Availability and/or Safety (CIAS) of the organization's systems, applications, services and data.	5

ID.AM-03	N/A	Representations of the organization's authorized network communication and internal and external network data flows are maintained.	Functional	intersects with	Network Diagrams & Data Flow Diagrams (DFDs)	AST-04	Mechanisms exist to maintain network architecture diagrams that: (1) Contain sufficient detail to assess the security of the network's architecture; (2) Reflect the current architecture of the network environment; and (3) Document all sensitive/regulated data flows.	5	
ID.AM-03	N/A	Representations of the organization's authorized network communication and internal and external network data flows are maintained.	Functional	intersects with	Control Applicability Boundary Graphical Representation	AST-04.2	Mechanisms exist to ensure control applicability is appropriately-determined for systems, applications, services and third parties by graphically representing applicable boundaries.	5	
ID.AM-03	N/A	Representations of the organization's authorized network communication and internal and external network data flows are maintained.	Functional	intersects with	Geographic Location of Data	DCH-19	Mechanisms exist to inventory, document and maintain data flows for data that is resident (permanently or temporarily) within a service's geographically distributed applications (physical and virtual), infrastructure, systems components and/or shared with other third-parties.	5	
ID.AM-04	N/A	Inventories of services provided by suppliers are maintained.	Functional	equal	Third-Party Inventories	TPM-01.1	Mechanisms exist to maintain a current, accurate and complete list of External Service Providers (ESPs) that can potentially impact the Confidentiality, Integrity, Availability and/or Satety (CIAS) of the organization's systems, applications, services and data.	10	
ID.AM-05	N/A	Assets are prioritized based on classification, criticality, resources, and impact on the mission.	Functional	intersects with	Asset Scope Classification	AST-04.1	Mechanisms exist to determine cybersecurity & data privacy control applicability by identifying, assigning and documenting the appropriate asset scope categorization for all systems, applications, services and personnel (internal and third-parties).	5	
ID.AM-05	N/A	Assets are prioritized based on classification, criticality, resources, and impact on the mission.	Functional	intersects with	Identify Critical Assets	BCD-02	Mechanisms exist to identify and document the critical systems, applications and services that support essential missions and business functions.	5	
ID.AM-05	N/A	Assets are prioritized based on classification, criticality, resources, and impact on the mission.	Functional	intersects with	Data & Asset Classification	DCH-02	Mechanisms exist to ensure data and assets are categorized in accordance with applicable statutory, regulatory and contractual requirements.	5	
ID.AM-05	N/A	Assets are prioritized based on classification, criticality, resources, and impact on the mission.	Functional	intersects with	Third-Party Criticality Assessments	TPM-02	Mechanisms exist to identify, prioritize and assess suppliers and partners of critical systems, components and services using a supply chain risk assessment process relative to their importance in supporting the delivery of high-value services.	5	
ID.AM-07	N/A	Inventories of data and corresponding metadata for designated data types are maintained.	Functional	intersects with	Media Storage	DCH-06	Mechanisms exist to: (1) Physically control and securely store digital and non-digital media within controlled areas using organization-defined security measures; and (2) Protect system media until the media are destroyed or sanitized using	5	
ID.AM-07	N/A	Inventories of data and corresponding metadata for designated data types are maintained.	Functional	intersects with	Sensitive Data Inventories	DCH-06.2	approved equipment, techniques and procedures. Mechanisms exist to maintain inventory logs of all sensitive media and conduct sensitive media inventories at least annually.	5	
ID.AM-07	N/A	Inventories of data and corresponding metadata for designated data	Functional	intersects with	Periodic Scans for Sensitive / Regulated	DCH-06.3	Mechanisms exist to periodically scan unstructured data sources for sensitive/regulated data or data requiring special protection measures by	5	
ID.AM-07	N/A	types are maintained. Inventories of data and corresponding metadata for designated data types are maintained.	Functional	intersects with	Data Personal Data (PD) Retention & Disposal	PRI-05	statutory, regulator or contractual obligations. (1) Retain Personal Data (PD), including metadata, for an organization-defined time period to full time purpose) glid intermediate, for an organization-defined time period to full time purpose) glid intermediate in the notice or as required by law; (2) Dispose of, destroys, ensess, and/or anonymizes the PD, regardless of the method of storage, and (3) Use organization-defined techniques or methods to ensure secure deletion or destruction of PD (including originals, copies and archived records).	5	
ID.AM-07	N/A	Inventories of data and corresponding metadata for designated data types are maintained.	Functional	intersects with	Inventory of Personal Data (PD)	PRI-05.5	Mechanisms exist to establish and maintain a current inventory of all systems, applications and services that collect, receive, process, store, transmit, update	5	
ID.AM-08	N/A	Systems, hardware, software, services, and data are managed	Functional	subset of	Asset Governance	AST-01	and/or share Personal Data (PD). Mechanisms exist to facilitate an IT Asset Management (ITAM) program to	10	
		throughout their life cycles. Systems, hardware, software, services, and data are managed			Stakeholder		Implement and manage asset management controls. Mechanisms exist to identify and involve pertinent stakeholders of critical		
ID.AM-08	N/A	throughout their life cycles.	Functional	intersects with	Identification & Involvement	AST-01.2	systems, applications and services to support the ongoing secure management of those assets.	5	
ID.AM-08	N/A	Systems, hardware, software, services, and data are managed throughout their life cycles.	Functional	intersects with	Data Protection	DCH-01	Mechanisms exist to facilitate the implementation of data protection controls.	5	
ID.AM-08	N/A	Systems, hardware, software, services, and data are managed throughout their life cycles.	Functional	intersects with	Data Stewardship Secure Development Life	DCH-01.1	Mechanisms exist to ensure data stewardship is assigned, documented and communicated.	5	
ID.AM-08	N/A	Systems, hardware, software, services, and data are managed throughout their life cycles.	Functional	intersects with	Cycle (SDLC)	PRM-07	Mechanisms exist to ensure changes to systems within the Secure Development Life Cycle (SDLC) are controlled through formal change control procedures.	5	
ID.AM-08	N/A	Systems, hardware, software, services, and data are managed throughout their life cycles.	Functional	intersects with	Management Predictable Failure Analysis	SEA-07	Mechanisms exist to determine the Mean Time to Failure (MTTF) for system components in specific environments of operation.	5	
ID.AM-08	N/A	Systems, hardware, software, services, and data are managed throughout their life cycles.	Functional	intersects with	Technology Lifecycle Management	SEA-07.1	Mechanisms exist to manage the usable lifecycles of technology assets.	5	
ID.RA	N/A	The cybersecurity risk to the organization, assets, and individuals is understood by the organization.	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls.	10	
ID.RA	N/A	The cybersecurity risk to the organization, assets, and individuals is understood by the organization.	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to coordinate cybersecurity, data protection and business alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
ID.RA	N/A	The cybersecurity risk to the organization, assets, and individuals is understood by the organization.	Functional	intersects with	Publishing Cybersecurity & Data Protection Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate cybersecurity & data protection policies, standards and procedures.	5	
ID.RA	N/A	The cybersecurity risk to the organization, assets, and individuals is understood by the organization.	Functional	intersects with	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	5	
ID.RA	N/A	The cybersecurity risk to the organization, assets, and individuals is understood by the organization.	Functional	intersects with	Supply Chain Risk Management (SCRM) Plan	RSK-09	Mechanisms exist to develop a plan for Supply Chain Risk Management (SCRM) associated with the development, acquisition, maintenance and disposal of systems, system components and services, including documenting selected mitigating actions and monitoring performance against those plans.	5	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	intersects with	Information Assurance (IA) Operations	IAO-01	Mechanisms exist to facilitate the implementation of cybersecurity & data privacy assessment and authorization controls.	5	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	intersects with	Assessments	IAO-02	Mechanisms exist to formally assess the cybersecurity & data privacy controls in systems, applications and services through Information Assurance Program (IAP) activities to determine the extent to which the controls are implemented correctly, operating as intended and producing the desired outcome with respect to meeting	5	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	intersects with	Plan of Action & Milestones (POA&M)	IAO-05	expected requirements. Mechanisms exist to generate a Plan of Action and Milestones (POA&M), or similar risk register, to document planned remedial actions to correct weaknesses or deficiencies noted during the assessment of the security controls and to reduce or eliminate known vulnerabilities.	5	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	intersects with	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's systems and data.	5	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	intersects with	Risk Register	RSK-04.1	disruption, modification of destruction of the organization's systems and data. Mechanisms exist to maintain a risk register that facilitates monitoring and reporting of risks.	5	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	intersects with	Cybersecurity & Data Privacy Testing Throughout Development	TDA-09	Mechanisms exist to require system developers/integrators consult with cybersecurity & data privacy personnel to: (1) Create and implement a Security Testing and Evaluation (ST&E) plan, or similar capability. (2) Implement a verifiable flaw remediation process to correct weaknesses and deficiencies identified during the security testing and evaluation process; and (3) Document the results of the security testing/evaluation and flaw remediation processes.	5	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	subset of	Vulnerability & Patch Management Program	VPM-01	Mechanisms exist to facilitate the implementation and monitoring of vulnerability management controls.	10	
ID.RA-01	N/A	Vulnerabilities in assets are identified, validated, and recorded.	Functional	intersects with	(VPMP) Vulnerability Scanning	VPM-06	Mechanisms exist to detect vulnerabilities and configuration errors by routine	5	
ID.RA-02	N/A	Cyber threat intelligence is received from information sharing forums and sources.	Functional	intersects with	Contacts With Groups & Associations	GOV-07	vulnerability acanning of systems and applications. Mechanisms exit to establish contact with selected groups and associations within the cybersecurity & data privacy communities to: (1) Facilitate ongoing cybersecurity & data privacy education and training for organizational personnel; (2) Maintain currency with recommended cybersecurity & data privacy practices, techniques and techniquises; and exchanologies; and (3) Share current cybersecurity and/or data privacy-related information including threats. vulnerabilities and incidents.	5	
ID.RA-02	N/A	Cyber threat intelligence is received from information sharing forums and sources.	Functional	intersects with	Threat Intelligence Feeds Feeds	THR-03	Mechanisms exist to maintain situational awareness of vulnerabilities and evolving threats by leveraging the knowledge of attacker tactics, techniques and procedures to facilitate the implementation of preventative and compensating controls.	5	
ID.RA-03	N/A	Internal and external threats to the organization are identified and recorded. Internal and external threats to the organization are identified and	Functional	subset of	Threat Intelligence Feeds Program Indicators of Exposure	THR-01	Mechanisms exist to implement a threat intelligence program that includes a cross organization information-sharing capability that can influence the development of the system and security architectures, selection of security solutions, monitoring, threat hunting, response and recovery activities. Mechanisms exist to develop indicators of Exposure (IOE) to understand the	10	
ID.RA-03	N/A	recorded.	Functional	intersects with	(IOE)	THR-02	Mechanisms exist to develop indicators of Exposure (IOE) to understand the potential attack vectors that attackers could use to attack the organization.	5

PR.PS-03	N/A	Hardware is maintained, replaced, and removed commensurate with risk.	Functional	intersects with	Unsupported Systems	TDA-17	Mechanisms exist to prevent unsupported systems by: (1) Replacing systems when support for the components is no longer available from the developer, vendor or manufacturer; and (2) Requiring justification and documented approval for the continued use of	5	
PR.PS-04	N/A	Log records are generated and made available for continuous	Functional	subset of	Continuous Monitoring	MON-01	unsupported system components required to satisfy mission/business needs. Mechanisms exist to facilitate the implementation of enterprise-wide monitoring controls.	10	
PR.PS-04	N/A	monitoring. Log records are generated and made available for continuous	Functional	intersects with		MON-01.4	controls. Mechanisms exist to generate, monitor, correlate and respond to alerts from physical, cybersecurity, data privacy and supply chain activities to achieve	5	
		monitoring.					integrated situational awareness.	1	

ecure Controls Framework (SCF) 11 of 16

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF#	Secure Controls Framework (SCF) Control Description	Strength of Relationship (optional)	Notes (optional)
PR.PS-04	N/A	Log records are generated and made available for continuous monitoring.	Functional	intersects with	Content of Event Logs	MON-03	Mechanisms exist to configure systems to produce event logs that contain sufficient information to, at a minimum: (1) Eatablish what type of event occurred; (2) When (alst and time) the event occurred; (3) When the event occurred; (4) The source of the event; (5) The outcome (success or failure) of the event; and the open of the event occurred; (5) The outcome (success or failure) of the event; and the open occurred of the event occurred.	5	
PR.PS-05	N/A	Installation and execution of unauthorized software are prevented.	Functional	intersects with	Configuration Management Program	CFG-01	Mechanisms exist to facilitate the implementation of configuration management controls.	5	
PR.PS-05	N/A	Installation and execution of unauthorized software are prevented.	Functional	intersects with	System Hardening Through Baseline Configurations	CFG-02	Mechanisms exist to develop, document and maintain secure baseline configurations for technology platforms that are consistent with industry-accepted system hardening standards.	5	
PR.PS-05	N/A	Installation and execution of unauthorized software are prevented.	Functional	intersects with	Least Functionality	CFG-03	Mechanisms exist to configure systems to provide only essential capabilities by specifically prohibiting or restricting the use of ports, protocols, and/or services.	5	
PR.PS-05	N/A	Installation and execution of unauthorized software are prevented.	Functional	intersects with	Prevent Unauthorized Software Execution	CFG-03.2	Mechanisms exist to configure systems to prevent the execution of unauthorized software programs.	5	
PR.PS-05	N/A	Installation and execution of unauthorized software are prevented.	Functional	intersects with	User-Installed Software	CFG-05	Mechanisms exist to restrict the ability of non-privileged users to install unauthorized software.	5	
PR.PS-05	N/A	Installation and execution of unauthorized software are prevented.	Functional	intersects with	Prohibit Installation Without Privileged Status	END-03	Automated mechanisms exist to prohibit software installations without explicitly assigned privileged status.	5	
PR.PS-06	N/A	Secure software development practices are integrated, and their performance is monitored throughout the software development life cycle.	Functional	intersects with	Technology Development & Acquisition	TDA-01	Mechanisms exist to facilitate the implementation of tailored development and acquisition strategies, contract tools and procurement methods to meet unique business needs.	5	
PR.PS-06	N/A	Secure software development practices are integrated, and their performance is monitored throughout the software development life cycle.	Functional	intersects with	Product Management	TDA-01.1	Mechanisms exist to design and implement product management processes to proactively govern the design, development and production of products and/or services across the System Development Life Cycle (SDLC) to: (1) Improve functionality; (2) Enhance security and resiliency capabilities; (3) Correct security deficiencies; and (4) Conform with applicable statutory, regulatory and/or contractual obligations.	5	
PR.PS-06	N/A	Secure software development practices are integrated, and their performance is monitored throughout the software development life	Functional	intersects with	Secure Software Development Practices	TDA-06	Mechanisms exist to develop applications based on Secure Software Development Practices (SSDP).	5	
PR.PS-06	N/A	cycle. Secure software development practices are integrated, and their performance is monitored throughout the software development life	Functional	intersects with	(SSDP) Criticality Analysis	TDA-06.1	Mechanisms exist to require the developer of the system, system component or service to perform a criticality analysis at organization-defined decision points in	5	
		cycle. Secure software development practices are integrated, and their					the Secure Development Life Cycle (SDLC). Mechanisms exist to perform threat modelling and other secure design		
PR.PS-06	N/A	performance is monitored throughout the software development life cycle. Secure software development practices are integrated, and their	Functional	intersects with	Threat Modeling	TDA-06.2	techniques, to ensure that threats to software and solutions are identified and accounted for. Mechanisms exist to utilize a Software Assurance Maturity Model (SAMM) to govern	5	
PR.PS-06	N/A	performance is monitored throughout the software development life cycle.	Functional	intersects with	Software Assurance Maturity Model (SAMM)	TDA-06.3	a secure development lifecycle for the development of systems, applications and services.	5	
PR.PS-06	N/A	Secure software development practices are integrated, and their performance is monitored throughout the software development life cycle.	Functional	intersects with	Cybersecurity & Data Privacy Testing Throughout Development	TDA-09	Mechanisms exist to require system developers/integrators consult with cybersecurity & data privacy personnel to: (1) Create and implement a Security Testing and Evaluation (ST&E) plan, or similar capability; (2) Implement a verifiable flaw remediation process to correct weaknesses and deficiencies identified during the security testing and evaluation process; and (3) Document the results of the security testing/evaluation and flaw remediation processes.	5	
PR.IR	N/A	Security architectures are managed with the organization's risk strategy to protect asset confidentiality, integrity, and availability, and organizational resilience.	Functional	subset of	Cybersecurity & Data Protection Governance Program	GOV-01	Mechanisms exist to facilitate the implementation of cybersecurity & data protection governance controls. Mechanisms exist to coordinate cybersecurity, data protection and business	10	
PR.IR	N/A	Security architectures are managed with the organization's risk strategy to protect asset confidentiality, integrity, and availability, and organizational resilience.	Functional	intersects with	Steering Committee & Program Oversight	GOV-01.1	alignment through a steering committee or advisory board, comprised of key cybersecurity, data privacy and business executives, which meets formally and on a regular basis.	5	
PR.IR	N/A	Security architectures are managed with the organization's risk strategy to protect asset confidentiality, integrity, and availability, and organizational resilience.	Functional	intersects with	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls.	5	
PR.IR	N/A	Security architectures are managed with the organization's risk strategy to protect asset confidentiality, integrity, and availability, and organizational resilience.	Functional	subset of	Secure Engineering Principles	SEA-01	Mechanisms exist to facilitate the implementation of industry-recognized cybersecurity & data privacy practices in the specification, design, development, implementation and modification of systems and services.	10	
PR.IR	N/A	Security architectures are managed with the organization's risk strategy to protect asset confidentiality, integrity, and availability, and organizational resilience.	Functional	intersects with	Centralized Management of Cybersecurity & Data Privacy Controls	SEA-01.1	Mechanisms exist to centrally-manage the organization-wide management and implementation of cybersecurity & data privacy controls and related processes.	5	
PR.IR	N/A	Security architectures are managed with the organization's risk strategy to protect asset confidentiality, integrity, and availability, and organizational resilience.	Functional	intersects with	Achieving Resilience Requirements	SEA-01.2	Mechanisms exist to achieve resilience requirements in normal and adverse situations.	5	
PR.IR	N/A	Security architectures are managed with the organization's risk strategy to protect asset confidentiality, integrity, and availability, and organizational resilience.	Functional	intersects with	Alignment With Enterprise Architecture	SEA-02	Mechanisms exist to develop an enterprise architecture, aligned with industry- recognized leading practices, with consideration for cybersecurity & data privacy principles that addresses risk to organizational operations, assets, individuals, other organizations.	5	
PR.IR-01	N/A	Networks and environments are protected from unauthorized logical access and usage.	Functional	subset of	Network Security Controls (NSC)	NET-01	Mechanisms exist to develop, govern & update procedures to facilitate the implementation of Network Security Controls (NSC).	10	
PR.IR-01	N/A	Networks and environments are protected from unauthorized logical access and usage.	Functional	intersects with	Layered Network Defenses	NET-02	Mechanisms exist to implement security functions as a layered structure that minimizes interactions between layers of the design and avoids any dependence by lower layers on the functionality or correctness of higher layers.	5	
PR.IR-01	N/A	Networks and environments are protected from unauthorized logical access and usage.	Functional	intersects with	Secure Engineering Principles	SEA-01	Mechanisms exist to facilitate the implementation of industry-recognized cybersecurity & data privacy practices in the specification, design, development, implementation and modification of systems and services. Mechanisms exist to develop an enterprise architecture, aligned with industry-	5	
PR.IR-01	N/A	Networks and environments are protected from unauthorized logical access and usage.	Functional	intersects with	Alignment With Enterprise Architecture	SEA-02	recognized leading practices, with consideration for cybersecurity & data privacy principles that addresses risk to organizational operations, assets, individuals, other organizations.	5	
PR.IR-02	N/A	The organization's technology assets are protected from environmental threats.	Functional	intersects with	Business Continuity Management System (BCMS)	BCD-01	Wechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	5	
PR.IR-02	N/A	The organization's technology assets are protected from environmental threats.	Functional	subset of	Physical & Environmental Protections	PES-01	Mechanisms exist to facilitate the operation of physical and environmental protection controls.	10	
PR.IR-02	N/A	The organization's technology assets are protected from environmental threats.	Functional	intersects with	Supporting Utilities	PES-07	Facility security mechanisms exist to protect power equipment and power cabling for the system from damage and destruction.	5	
PR.IR-02	N/A	The organization's technology assets are protected from environmental threats.	Functional	intersects with	Water Damage Protection	PES-07.5	Facility security mechanisms exist to protect systems from damage resulting from water leakage by providing master shutoff valves that are accessible, working	5	
PR.IR-02	N/A	The organization's technology assets are protected from	Functional	intersects with	Fire Protection	PES-08	properly and known to key personnel. Facility security mechanisms exist to utilize and maintain fire suppression and detection devices/systems for the system that are supported by an independent	5	
PR.IR-02	N/A	environmental threats. The organization's technology assets are protected from	Functional	intersects with	Temperature & Humidity	PES-09	energy source. Facility security mechanisms exist to maintain and monitor temperature and	5	
PR.IR-02	N/A	environmental threats. The organization's technology assets are protected from environmental threats.	Functional	intersects with	Controls Achieving Resilience Requirements	SEA-01.2	humidity levels within the facility. Mechanisms exist to achieve resilience requirements in normal and adverse situations.	5	
PR.IR-02	N/A	The organization's technology assets are protected from environmental threats.	Functional	intersects with	Threat Catalog	THR-09	Mechanisms exist to develop and keep current a catalog of applicable internal and external threats to the organization, both natural and manmade.	5	
PR.IR-03	N/A	Mechanisms are implemented to achieve resilience requirements in normal and adverse situations.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
PR.IR-03	N/A	Mechanisms are implemented to achieve resilience requirements in normal and adverse situations.	Functional	intersects with	Secure Engineering Principles	SEA-01	Mechanisms exist to facilitate the implementation of industry-recognized cybersecurity & data privacy practices in the specification, design, development, implementation and modification of systems and services.	5	
PR.IR-03	N/A	Mechanisms are implemented to achieve resilience requirements in normal and adverse situations.	Functional	intersects with	Alignment With Enterprise Architecture	SEA-02	Mechanisms exist to develop an enterprise architecture, aligned with industry- recognized leading practices, with consideration for cybersecurity & data privacy principles that addresses risk to organizational operations, assets, individuals, other organizations.	5	
PR.IR-03	N/A	Mechanisms are implemented to achieve resilience requirements in normal and adverse situations.	Functional	intersects with	Achieving Resilience Requirements	SEA-01.2	Mechanisms exist to achieve resilience requirements in normal and adverse situations.	5	
PR.IR-04	N/A	Adequate resource capacity to ensure availability is maintained.	Functional	subset of	Capacity & Performance Management	CAP-01	Mechanisms exist to facilitate the implementation of capacity management controls to ensure optimal system performance to meet expected and anticipated future capacity requirements.	10	
PR.IR-04	N/A	Adequate resource capacity to ensure availability is maintained.	Functional	intersects with	Resource Priority	CAP-02	Mechanisms exist to control resource utilization of systems that are susceptible to Denial of Service (DoS) attacks to limit and prioritize the use of resources.	5	
PR.IR-04	N/A	Adequate resource capacity to ensure availability is maintained.	Functional	intersects with	Capacity Planning	CAP-03	Mechanisms exist to conduct capacity planning so that necessary capacity for information processing, telecommunications and environmental support will exist during contingency operations.	5	

FDE#	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF#	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes (optional)
PR.IR-04	N/A	Adequate resource capacity to ensure availability is maintained.	Functional	intersects with	Performance Monitoring	CAP-04	Automated mechanisms exist to centrally-monitor and alert on the operating state and health status of critical systems, applications and services.	(optional) 5	
PR.IR-04	N/A	Adequate resource capacity to ensure availability is maintained.	Functional	intersects with	Elastic Expansion	CAP-05	Mechanisms exist to dynamically expand the resources available for services, as demand conditions change.	5	
DE	N/A	Possible cybersecurity attacks and compromises are found and	Functional	subset of	Threat Intelligence Feeds	THR-01	Mechanisms exist to implement a threat intelligence program that includes a cross organization information-sharing capability that can influence the development of	10

RS.CO-03	N/A	Information is shared with designated internal and external stakeholders.	Functional	intersects with	Incident Handling	IRO-02	Supply chain for existens or existens components related to the incident. Mechanisms exist to cover: (1) Preparation; (2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (5) Endication; and (6) Recovery.	5	
RS.CO-03	N/A	Information is shared with designated internal and external stakeholders.	Functional	intersects with	Incident Stakeholder Reporting	IRO-10	Mechanisms exist to timely-report incidents to applicable: (1) Internal stakeholders; (2) Affected clients & third-parties; and (3) Regulatory authorities.	5	
RS.CO-03	N/A	Information is shared with designated internal and external stakeholders.	Functional	intersects with	Cyber Incident Reporting for Sensitive Data	IRO-10.2	Mechanisms exist to report sensitive/regulated data incidents in a timely manner.	5	
RS.CO-03	N/A	Information is shared with designated internal and external stakeholders.	Functional	intersects with	Supply Chain Coordination	IRO-10.4	Mechanisms exist to provide cybersecurity & data privacy incident information to the provider of the product or service and other organizations involved in the supply chain for systems or system components related to the incident.	5	
RS.MI	N/A	Activities are performed to prevent expansion of an event and mitigate its effects.	Functional	intersects with	Incident Response Operations	IRO-01	Mechanisms exist to implement and govern processes and documentation to facilitate an organization-wide response capability for cybersecurity & data privacy- related incidents. Mechanisms exist to cover:	5	
RS.MI	N/A	Activities are performed to prevent expansion of an event and mitigate its effects.	Functional	intersects with	Incident Handling	IRO-02	Precinitismine asia to cover: (2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (5) Endication; and (6) Recovery.	5	
RS.MI	N/A	Activities are performed to prevent expansion of an event and mitigate its effects.	Functional	intersects with	Incident Response Plan (IRP)	IRO-04	Mechanisms exist to maintain and make available a current and viable Incident Response Plan (IRP) to all stakeholders.	5	
RS.MI-01	N/A	Incidents are contained.	Functional	subset of	Incident Handling	IRO-02	Mechanisms exist to cover: [1) Preparation; [2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (5) Enalceation; and [6) Recovery.	10	
RS.MI-02	N/A	Incidents are eradicated.	Functional	subset of	Incident Handling	IRO-02	Mechanisms exist to cover: (1) Preparation; (2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (5) Endication; and (5) Recovery.	10	
RC	N/A	Assets and operations affected by a cybersecurity incident are restored.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	

FDE#	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF#	Secure Controls Framework (SCF) Control Description	Strength of Relationship (optional)	Notes (optional)
RC	N/A	Assets and operations affected by a cybersecurity incident are restored.	Functional	intersects with	Information System Recovery & Reconstitution	BCD-12	Mechanisms exist to ensure the secure recovery and reconstitution of systems to a known state after a disruption, compromise or failure.	5	
RC.RP	N/A	Restoration activities are performed to ensure operational availability of systems and services affected by cybersecurity incidents.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
RC.RP	N/A	Restoration activities are performed to ensure operational availability of systems and services affected by cybersecurity incidents.	Functional	intersects with	Recovery Time / Point Objectives (RTO / RPO)	BCD-01.4	Mechanisms exist to facilitate recovery operations in accordance with Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs).	5	
RC.RP	N/A	Restoration activities are performed to ensure operational availability of systems and services affected by cybersecurity incidents.	Functional	intersects with	Identify Critical Assets	BCD-02	Mechanisms exist to identify and document the critical systems, applications and services that support essential missions and business functions.	5	
RC.RP	N/A	Restoration activities are performed to ensure operational availability of systems and services affected by cybersecurity incidents.	Functional	intersects with	Resume All Missions & Business Functions	BCD-02.1	Mechanisms exist to resume all missions and business functions within Recovery Time Objectives (RTOs) of the contingency plan's activation.	5	
RC.RP-01	N/A	The recovery portion of the incident response plan is executed once initiated from the incident response process.	Functional	intersects with	Recovery Operations Criteria	BCD-01.5	Mechanisms exist to define spefic criteria necessary that must be met to execute Disaster Recover / Business Continuity (BC/DR) plans to facilitate business continuity operations capable of meeting applicable Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs).	5	
RC.RP-01	N/A	The recovery portion of the incident response plan is executed once initiated from the incident response process.	Functional	intersects with	Information System Recovery & Reconstitution	BCD-12	Mechanisms exist to ensure the secure recovery and reconstitution of systems to a known state after a disruption, compromise or failure.	5	
RC.RP-02	N/A	Recovery actions are selected, scoped, prioritized, and performed.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
RC.RP-02	N/A	Recovery actions are selected, scoped, prioritized, and performed.	Functional	intersects with	Recovery Time / Point Objectives (RTO / RPO)	BCD-01.4	Mechanisms exist to facilitate recovery operations in accordance with Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs).	5	
RC.RP-02	N/A	Recovery actions are selected, scoped, prioritized, and performed.	Functional	intersects with	Identify Critical Assets	BCD-02	Mechanisms exist to identify and document the critical systems, applications and services that support essential missions and business functions.	5	
RC.RP-02	N/A	Recovery actions are selected, scoped, prioritized, and performed.	Functional	intersects with	Resume All Missions & Business Functions	BCD-02.1	Mechanisms exist to resume all missions and business functions within Recovery Time Objectives (RTOs) of the contingency plan's activation.	5	
RC.RP-03	N/A	The integrity of backups and other restoration assets is verified before using them for restoration.	Functional	intersects with	Backup & Restoration Hardware Protection	BCD-13	Mechanisms exist to protect backup and restoration hardware and software.	5	
RC.RP-03	N/A	The integrity of backups and other restoration assets is verified before using them for restoration.	Functional	intersects with	Restoration Integrity Verification	BCD-13.1	Mechanisms exist to verify the integrity of backups and other restoration assets prior to using them for restoration.	5	
RC.RP-04	N/A	Critical mission functions and cybersecurity risk management are considered to establish post-incident operational norms.	Functional	subset of	Business Continuity Management System (BCMS)	BCD-01	Mechanisms exist to facilitate the implementation of contingency planning controls to help ensure resilient assets and services (e.g., Continuity of Operations Plan (COOP) or Business Continuity & Disaster Recovery (BC/DR) playbooks).	10	
RC.RP-04	N/A	Critical mission functions and cybersecurity risk management are considered to establish post-incident operational norms.	Functional	intersects with	Recovery Time / Point Objectives (RTO / RPO)	BCD-01.4	Mechanisms exist to facilitate recovery operations in accordance with Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs).	5	
RC.RP-04	N/A	Critical mission functions and cybersecurity risk management are considered to establish post-incident operational norms.	Functional	intersects with	Identify Critical Assets	BCD-02	Mechanisms exist to identify and document the critical systems, applications and services that support essential missions and business functions.	5	
RC.RP-04	N/A	Critical mission functions and cybersecurity risk management are considered to establish post-incident operational norms.	Functional	intersects with	Resume All Missions & Business Functions	BCD-02.1	Mechanisms exist to resume all missions and business functions within Recovery Time Objectives (RTOs) of the contingency plan's activation.	5	
RC.RP-05	N/A	The integrity of restored assets is verified, systems and services are restored, and normal operating status is confirmed.	Functional	subset of	Information System Recovery & Reconstitution	BCD-12	Mechanisms exist to ensure the secure recovery and reconstitution of systems to a known state after a disruption, compromise or failure.	10	
RC.RP-06	N/A	The end of incident recovery is declared based on criteria, and incident related documentation is completed.	Functional	intersects with	Incident Handling	IRO-02	Mechanisms exist to cover: (1) Preparation; (2) Automated event detection or manual incident report intake; (3) Analysis; (4) Containment; (5) Endication; and (6) Recovery.	5	
RC.RP-06	N/A	The end of incident recovery is declared based on criteria, and incident related documentation is completed.	Functional	intersects with	Situational Awareness For Incidents	IRO-09	Mechanisms exist to document, monitor and report the status of cybersecurity & data privacy incidents to internal stakeholders all the way through the resolution of the incident.	5	
RC.CO	N/A	Restoration activities are coordinated with internal and external parties.	Functional	intersects with	Coordinate with Related Plans	BCD-01.1	Mechanisms exist to coordinate contingency plan development with internal and external elements responsible for related plans.	5	
RC.CO	N/A	Restoration activities are coordinated with internal and external parties.	Functional	intersects with	Coordinate With External Service Providers	BCD-01.2	Mechanisms exist to coordinate internal contingency plans with the contingency plans of external service providers to ensure that contingency requirements can be satisfied.	5	
RC.CO-03	N/A	Recovery activities and progress in restoring operational capabilities are communicated to designated internal and external stakeholders.	Functional	equal	Recovery Operations Communications	BCD-01.6	Mechanisms exist to communicate the status of recovery activities and progress in restoring operational capabilities to designated internal and external stakeholders.	10	
RC.CO-04	N/A	Public updates on incident recovery are shared using approved methods and messaging.	Functional	subset of	Public Relations & Reputation Repair	IRO-16	Mechanisms exist to proactively manage public relations associated with incidents and employ appropriate measures to prevent further reputational damage and develop plans to repair any damage to the organization's reputation.	10
